Construction Update
Normandale Neighborhood Roadway Reconstruction

March 6, 2013

Dear Resident:

The City opened bids for the reconstruction project in your neighborhood Feb. 20. Northwest Asphalt, Inc. provided a bid that was lower than our estimate. On March 5, the Edina City Council awarded the construction project to Northwest.

As a result of the lower bid, your assessment may be reduced. We estimated the street reconstruction portion of the assessment to be $12,300. With the current bids, the actual cost could be as low as $9,000 per assessment. However, we will not know this value until after construction is completed. The project costs could go up or down depending on conditions encountered during construction.

Figure 1 on the next page shows the project's private sanitary sewer service pipe reconstruction plan. You are not required to upgrade your sanitary sewer service pipe as part of the project because it is not located in the City's street right-of-way (ROW). You will only be assessed for the street reconstruction portion of the assessment. Even though your sanitary sewer service pipe is located in a back/side yard or outside of the street ROW, this may be a good time to upgrade your sanitary sewer service pipe and your water service pipe at your own cost.

We recommend you contact a few contractors to analyze your water service and sanitary sewer service pipes. For your convenience, we've enclosed a list of contractors who have previously worked in the City. If you choose to hire a private contractor to reconstruct your service pipes, the City Council approved a process for you to add that cost to your special assessment. For more information, please contact Toby Muse at SEH.

Private contractors hired by property owners must obtain a permit, complete their work and obtain a passing visual inspection by the City's Building Inspections Division. Please make sure your private contractor coordinates completion of inspections with the Building Inspections Division.
