Subject: 66th and France nightmare.

To The Transportation Commission Edina

Your so called improvement to 66th and France is a nightmare for many residence at Point of France. We can no longer get across France or 66th Street without fear of being run down. It was completely impossible during the winter but just as impossible now this Spring.

- 1) Cars stop in the crosswalks.
- 2) Right turns, cars drive into the crosswalk and most frequently don't even stop on red they just turn.
- 3) Left turn, cars drive right into the crosswalk. So if you are walking you need to walk in and out of the cars.

Can you please tell me how this is safer and will encourage walking ?

Sixteen of us who walk at Southdale every morning all drive to Southdale as it is the only safe way to get across either 66th Street or France Avenue.

Have any of you looked to see the mess you have created ?

Thanks for messing up this intersection.

Allan Johnson
