\$3.25 per ton  
\$3.55 per ton + \$7,000 mobilization  
\$3.70 per ton + \$3,500 mobilization

**Recommended Quote or Bid:**

Jay Johnson Construction

**General Information:**

This purchase is for the crushing and recycling of our concrete and blacktop material as generated by the Public Works Department, which includes utilities, streets, and park maintenance division activities. Staff will utilize this material to build City construction projects to help reduce the costs of those projects. An example of this material use was the trail construction activity that was completed last summer between Kellogg and Parklawn. This type of recycling program has been completed over the past 14-16 years and was last completed in May of 2011 for a cost of \$3.16 per ton. Three quotes were received for this work and it will be funded by the streets, utilities and parks division operating budgets. Staff has calculated and is asking for approval for a not to exceed quantity of 15,000 tons.
