\$1,008,125.00
\$1,565,509.00

Recommended Quote or Bid:

Lametti & Sons, Inc.

\$789,940.00

General Information:

This project involves trunk sanitary sewer lining and manhole rehabilitation in an effort to reduce infiltration and inflow into the City's sanitary sewer system, and to renew the aging sanitary sewer conveyance system. The project area was identified through the Trunk Sanitary Sewer Infiltration Study Report completed in December 2013. The Report analyzed the trunk sewer system serving the City of Edina and prioritized segments for rehabilitation. The project was ordered by the Edina City Council at the December 17, 2013 council meeting.

During final design, neighboring residents impacted by the project were contacted and an open house was held at City Hall on March 6, 2014. Prior to construction neighboring residents will be invited to a second open house, the contractor will be present at the open house to answer questions regarding schedule and overall project impact.

The project will be funded in part by grant funding secured through the Metropolitan Council. Construction of the project is expected to take approximately 2 months and will be complete by August 30.

Staff recommends awarding the 2014 Trunk Sewer Rehabilitation project to Lametti & Sons, Inc.
