General Information:

Staff recommends utilizing Minnesota Services Cooperative Purchase pricing for the purchase of the Field Turf XM6 - 57 Series 2.25" for Pamela Park. The system that is being proposed is FieldTurf XM6 – 57 Series. The FieldTurf XM6 system is built with cutting edge monofilament fibre technology that adds a new dimension to the XM series, giving it added durability and resilience so the field can perform at a higher level. The infill in the XM system is FieldTurf's 2-layer SBR Rubber and Silica Sand infill that has been installed on hundreds and hundreds of fields worldwide to ensure proper safety and athlete cushion.

The FieldTurf XM6 System include:

- Triangle-shaped monofilament fibre for proper playability and resilience
- Five built-in ridges strategically placed for added durability
- Exceptionally resilient and soft fibre that has been designed to provide excellent long-term durability
- Proven XM infill and backing for player safety and comfort while providing excellent drainage characteristics

The proposal includes purchase, delivery and installation of the FieldTurf. The concrete curbing surrounding the turf will be bid as a part of the Pamela Park Site Bid Package.

This item is budgeted through the Pamela Park project. Savings for this product using the Minnesota Services Cooperative program is \$32,500. This discount reflects the donation of all five markings on the field. This agenda item is marked "Not Within Budget" because it will be paid for by a bond issue and not by funds from the City Council approved City of Edina Budget.
