Hardrives, Inc.	\$709,354.89

Recommended Quote or Bid:

Park Construction Company	\$591,852.55
---------------------------	--------------

General Information:

The Olinger Boulevard Mill and Overlay maintenance project extends from Vernon Avenue to Tracy Avenue in 2014. The project will consist of a full depth mill and overlay of Olinger Boulevard with minor upgrades taking place to the sanitary sewer manholes and storm sewer inlets along the route. Crosswalks markings and signage will be included at the location of existing sidewalk intersections with Olinger Boulevard.

Olinger Boulevard is an Approved Primary Bike Route in the City's Comprehensive Plan. Staff has included improved bicycle facilities within this road. The bicycle facilities will include a dedicated bicycle lane along the west/south side of Olinger along the entire route and along the east/north side from Vernon to Olinger Road. Parking will remain prohibited in these locations. Olinger Blvd Along the east/north side from Olinger Rd to Tracy, the roadway will include a 13 foot shared driving/bicycle lane and a 7 foot parking lane. The 13 foot shared lane required a variance from MnDOT Municipal State Aid which was approved by the State Aid Variance Committee on June 19, 2014.

Project funding will come from a combination of Municipal State Aid and Edina sanitary and storm sewer utility funds. In the 2013 Edina Capital Budget, \$800,000 was budgeted for the project from Municipal State Aid Funds. The Edina Engineering Department's estimate for the Olinger Boulevard Mill and Overlay Project

REQUEST FOR PURCHASE
IN EXCESS OF \$20,000/CHANGE ORDER

was \$762,288. The bid submitted by Park Construction is 22% lower than the Engineers Estimate and within budget allocations planned for in the 2013-2017 City of Edina capital Improvement Plan.

Staff recommends awarding the project to Park Construction Company, Inc.
