General Information:

As part of the renovations at Pamela Park, this project will extend the City's fiber optic network to the new shelter. Connection to the City's fiber infrastructure allows for faster and more reliable connections to support the card access system, VoIP phone lines and Wi-Fi. This connection also offers the flexibility to support additional needs in the future, such as HVAC and lighting control, security cameras, water utility communication and connections to other City locations.

This agenda item is marked "Not Within Budget" because it will be paid for by a bond issue and not by funds from the General Fund. There was an allocation of \$45,000 for the installation of fiber in the Pamela Park project budget.

Staff recommends awarding the project to Castrejon, Inc.
