

**To:** MAYOR AND CITY COUNCIL

**Agenda Item #:** V. A.

**From:** Chad A. Millner, PE, Director of Engineering

**Action**

**Date:** September 2, 2014

**Discussion**

**Subject:** France Avenue Corridor Improvement Project

**Information**

**Action Requested:**

None. Informational Presentation

**Information / Background:**

Representatives from LHB will be presenting the elements of the urban design for the referenced project. The urban design includes incorporating elements of landscaping and lighting. The lighting portion of the project will focus on the intersections of 66<sup>th</sup> St, 70<sup>th</sup> St, and 76<sup>th</sup> St and France Ave.

The urban design was developed to create an identity to this corridor. We tried to create a streetscape to draw non-motorists to the area, particularly at the enhanced intersections and to begin to create the interface between the public and private realm. We hope by applying the groundwork, that the private realm will follow suit to create areas of activity centered around pedestrians.
