Amount of Quote or Bid:
\$65,651.09

Recommended Quote or Bid:

Becker Arena Products, National Joint Powers Alliance # 32624, Contract # 022113

General Information:

The current hockey boards are in extremely poor condition and a safety concern. The boards are made out of a plastic material that has not held up over time. Sections have been replaced over the years but this is getting very expensive and labor intensive and the hockey rink generally looks like it is in disrepair. The proposed boards are made out of a galvanized steel that will be much more durable and last longer but still allow for seasonal installation. City Council required that the hockey boards are portable and removed after each season. This is a high priority due to the fact that the current boards are not usable.

Vision 20/20, Objective 2 states: "Provide a level of City services that sets Edina apart from other communities" and Objective 3 states; "Provide capital investments that balance need and affordability" and the Comprehensive Plan discusses maintaining Park infrastructure. This project repurposes aging infrastructure and allow us to provide a level of service that sets Edina apart from other communities.
