1.0 Summary

This Environmental Site Assessment (ESA) was completed in accordance with the standards of the American Society for Testing and Materials Phase I Environmental Site Assessment Process – Designation E-1527-05 (the Practice). The ESA focuses on applying *good commercial and customary practice* to identify *recognized environmental conditions* with respect to a parcel (or parcels) of *commercial real estate*. The primary focus is to determine whether any on-site operations, either present or historic, have caused or contributed to releases of *hazardous substances* or *petroleum products* to the environment. Additionally, the ESA requires the *environmental professional* to evaluate *business environmental risk* associated with the parcel that may ultimately necessitate investigation beyond that identified within the minimum scope of the Practice.

In addition, the intent of this ESA is to conform the developing standard of "All Appropriate Inquiry," as driven by Federal legislation (to be codified in Part 312 – Standards for Conducting All Appropriate Inquiry). This review was conducted by Environmental Professionals who meet the qualifications under development by the regulatory negotiations committee, and generally meets or exceed the requirements for historical inquiry.

In the process of preparing this ESA, the following steps were taken: a *records review* from various sources; a *site reconnaissance*; *interviews* with persons knowledgeable about the Subject Property; *evaluation* of the revealed information; and *preparation of this report.*

1.1 SUBJECT PROPERTY DESCRIPTION

Wenck Associates, Inc. (Wenck) was authorized by Andrew Leith of the Hennepin County Environmental Services to conduct a Phase I Environmental Site Assessment (ESA) of the Subject Property in Edina, MN. The Subject Property is currently the Edina Public Works Garage located at 5146 Eden Avenue in Edina, Minnesota. The Subject Property's main use is storage and maintenance of equipment used by the City of Edina. The Subject Property is also used as a storage facility for road materials such as aggregate and salt. There are two buildings located on the Subject Property.

The Subject Property location is depicted in Figure 1. A Site Map is provided in Figure 2. The approximately 3.34 acre Subject Property is located in Hennepin County within Section 28 of Township 117 North, Range 21 West of the 5th Prime Meridian.

1.2 SUBJECT PROPERTY HISTORY

Based on the review of revealed information, the Subject Property has been used by the City of Edina Public Works since 1962. The use of the Subject Property before that time was in connection with the school district and possibly the railroad. The Subject Property is located in an industrial/commercial area of Edina, MN that was agricultural in its past use. Past buildings are known to exist on the west, southwest, and south portions of the Subject Property. Underground storage tanks (USTs) were used for fuel and waste oil storage in the past, but have all been removed and replaced with aboveground storage tanks (ASTs).

1.3 SUBJECT PROPERTY OBSERVATIONS

The Subject Property a relatively flat industrial site with a retaining wall on the north and east side where a hill has been cut away to make more room for storage. The main building on the Subject Property is a 268' x 151' concrete, slab on grade garage, office, and storage building with a pre-stressed concrete roof topped with gravel and tar. An asphalt parking area is located

east of the main building, a grass lawn area and driveway are located south of the building, a grass side hill is located west of the main building between it and the railroad, and to the north is a paved storage area. A three-sided salt storage building is also located north of the main building. To the north of the Subject Property is retail, to the east is an office building and the Eden Avenue Grill, to the south is the Our Lady of Grace Church and the Minnesota Wanner Co., and to the west is the Burlington Northern Railroad with the Edina Bus Garage, a retail area, and a parking ramp across the railroad. The general grade of the Subject Property is to the south. The parking area, east driveway and south driveway are lined with curb and gutter and storm sewer catch basins run down the center of the parking area. Storm sewer catch basins are also located in the paved storage area. Inside the main building, the west side is generally used for storage and maintenance of equipment, the southeast is used as office space, and the northeast is generally used as tool, electrical, and miscellaneous storage.

1.4 SUBJECT PROPERTY REGULATORY INFORMATION

A regulatory database review was requested to provide information about verified potential sites at or near the Subject Property.

The Subject Property **is** listed on the UST, AST, RCRA-SQG, FINDS, HMIRS, MN Spills, and MN AGSPILLS databases.

Additional sites identified within the search radii defined by the Practice are as follows:

22	RCRA Small Quantity Generator (SQG) of Hazardous Waste sites
1	MN List of Sites (LS)
12	Leaking Underground Storage Tank (LUST) sites
11	Underground Storage Tank (UST) sites
1	Leaking Aboveground Storage Tank (LAST) site
2	Aboveground Storage Tank (AST) site

Additional information about the regulatory review is found in Section 5.1 – *Records Review.*

1.5 RECOGNIZED ENVIRONMENTAL CONDITIONS

Based on the revealed information, there was one *recognized environmental condition* associated with the Subject Property.

- The petroleum sheen noticed running off the asphalt pile located north of the main building into the storm sewer indicates a petroleum release and is a *recognized environmental condition.*

2.0 Purpose and Scope

2.1 PURPOSE

The conclusions contained in this report have been made to assist Hennepin County Environmental Services in making a reasonable assessment of business related environmental risk with respect to recognized environmental conditions at the Subject Property at the present time. In addition the report is intended to satisfy the requirements of "all appropriate inquiry consistent with good commercial or customary practice" referenced in Superfund Amendments and Reauthorization Act § 9601(35)(B).

2.2 SCOPE

This ESA was prepared in accordance with the ASTM E 1527-05 standard and All Appropriate Inquiry (AAI) Rule. The purpose of this ESA was to identify, to the extent feasible and in accordance with the processes described herein, recognized environmental conditions in connection with the Subject Property. As defined in ASTM E 1527-05, the term *recognized environmental condition* means "the presence or likely presence of any *hazardous substances* or *petroleum products* on a *property* under conditions that indicate an existing release, a past release, or a material threat of a release of any *hazardous substances* or *petroleum products* into structures on the *property* or into the ground, ground water, or surface water of the *property*." A summary of the general scope of work for this project is described in the following tasks:

I. Records Retrieval and Review of Records
II. Site Reconnaissance
III. Interviews with those having knowledge about the Subject Property
IV. Reporting

Task I involved obtaining *publicly available, practically reviewable* and *reasonably ascertainable* federal, state, county, and city information about the Subject Property or the adjacent properties. The purpose was to help identify recognized environmental conditions in connection with the Subject Property. This search reviewed Superfund sites; waste treatment, storage, and disposal facilities regulated under RCRA; spills or discharges of hazardous or toxic materials or petroleum products; and known or recorded landfills; well databases; etc.

As part of **Task I**, Wenck obtained reasonably ascertainable, publicly available, and practically reviewable standard sources of information pertaining to the Subject Property. These sources of information were searched for information that would yield information about recognized environmental conditions or business-related environmental risks in connection with the Subject Property or other properties within minimum established search distances of the Subject Property.

Task II involved a "walkover" survey of the Subject Property to visually inspect and evaluate the Subject Property for any recognized environmental condition or business-related environmental risks. The assessment included a visual inspection of the structures and the grounds. The grounds of the Subject Property were observed for filling, subsidence, unusual land or surface forms, colorations, odors, indications of any dumping, and evidence of any facilities on the Subject Property such as tanks, drains, drywells, etc. Observations pertaining to adjacent property use was also recorded where such observations pertained to recognized environmental conditions or business-related environmental risks.

Task III included interviews with people having knowledge of the Subject Property and the history of the surrounding properties in order to obtain information pertaining to recognized environmental conditions in connection with the Subject Property. These people included the Subject Property owner(s)/occupant(s), as well as local government officials.

Data gathered in the course of performing the above three tasks was used in concert to determine if information from one source indicated the need for additional information from another source.

Task IV involved assessment of the Subject Property by combining the information retrieved through data searches with the observations that were made during the Subject Property reconnaissance and interviews. Photographs were taken to document the overall status and current use of the Subject Property and specific areas of concern. **Task IV** also involved documenting the information from the previous tasks into this comprehensive report. The general contents of this report include:

1.0 Summary
2.0 Purpose and Scope
3.0 Site Description
4.0 User Provided Information
5.0 Records Review
6.0 Site Reconnaissance
7.0 Interviews
8.0 Findings
9.0 Opinion
10.0 Conclusions
11.0 Deviations from Scope
12.0 Non-Scope Considerations

14.0 Signature Page
15.0 Qualifications of Environmental Professional
Figures
Appendices

Any deviations from the scope described in the ASTM E 1527-05 Practice are identified in Section 11.0.

2.3 SIGNIFICANT ASSUMPTIONS

Wenck requested all persons interviewed to provide accurate information that will assist Wenck in determining appropriate inquiry, including but not limited to actual knowledge, previously prepared reports, environmental cleanup liens, and title review information. In addition, Wenck assumes that for the purposes of the site reconnaissance, adequate information has been provided to accurately establish the physical boundaries of the parcel of real property to be evaluated.

2.4 LIMITATIONS AND EXCEPTIONS

The results of this study performed by Wenck are based on the scope of work defined in Section 2.2, subject to any project-specific limitations or project-specific additional non-scope considerations described herein.

As in the case with any investigation of finite scope, this review is intended to reduce, but cannot eliminate, the uncertainty regarding the potential for recognized environmental conditions in connection with a Subject Property. Therefore, the possibility of the presence of some localized substances that may be classified as hazardous cannot be ruled out completely. However, it is our opinion that the conditions observed at the Subject Property are representative of existing conditions at the time of the site reconnaissance.

2.5 SPECIAL TERMS AND CONDITIONS

The purpose of this report is to aid in the environmental assessment of the Subject Property and not to evaluate the structural condition of the buildings or other features of the Subject Property. Except as identified in Section 2.3 and 2.4, or as described in Section 11.0, no intentional deviations from the Practice were made in preparing this report.

Wenck has performed its work in a manner consistent with the care and skill ordinarily exercised by members of the environmental profession under similar budget and time constraints. The conclusions contained in this report represent our professional opinions. These opinions were

arrived at in accordance with currently accepted engineering practices at this time and location. Wenck Associates, Inc. does not offer any form of warranty or guarantee that the Subject Property contains no hazardous substances, pollutants or contaminants beyond those observed during the course of this assessment.

Wenck assumes no responsibility for the accuracy of information that was obtained from other sources, including, without limitation, regulatory and government agencies, persons knowledgeable about the Subject Property, and vendors of public practice.

2.6 USER RELIANCE

This report has been prepared solely for the information and use of the addressee or addressees. Others wishing to rely on the findings of this report not having a contractual relationship with Wenck do so without permission and at their own risk. Our professional recommendations made to the addressee(s) are exclusive to that party's disclosed intended or proposed consideration with respect to the Subject Property. Specifically, those parties who may rely on this report include:

- Hennepin County Environmental Services

3.0 Site Description

3.1 SITE LOCATION

The Subject Property is located in the City of Edina, Minnesota, in the northeast quarter of the west quarter of Section 28, Township 117 North, Range 21 West of the 5th Prime Meridian. The present address of the Subject Property is 5146 Eden Avenue. Eden Avenue lies to the south and Arcadia Avenue to the east of the Subject Property. The Subject Property is bordered on the west by the Minneapolis Northfield and Southern railroad. The Subject Property is zoned residential non-homestead.

3.2 SITE AND VICINITY GENERAL CHARACTERISTICS

The Subject Property is occupied by: one large building used for equipment storage, maintenance, and offices; a three-sided building used for road salt storage; an outdoor parking/storage area for equipment; a paved parking lot for employees; two large fuel aboveground storage tanks; and vegetated areas on the property edges. The Subject Property is located in an area that is predominately industrial/commercial in nature immediately around the Subject Property, and residential surrounding that.

3.3 CURRENT USE OF THE SUBJECT PROPERTY

The City of Edina Public Works has occupied the site since the early 1960s. The present building used for offices and equipment storage and maintenance was built in 1962. Equipment stored and maintained on the property is used for upkeep and maintenance of the City of Edina. Fuel for equipment is stored on site in two 12,000 gallon aboveground storage tanks.

There is currently one main building and one storage building on the Subject Property. A paved parking lot/outdoor storage area is located east and north of the main building.

3.4 DESCRIPTION OF STRUCTURES, ROADS, OTHER IMPROVEMENTS

There are two streets that adjoin the Subject Property. Arcadia Avenue adjoins the Subject Property to the east and Eden Avenue adjoins the Subject Property to the south. A paved driveway connects the main building to Eden Avenue to the south, while the main entrance for employees is through the east driveway located on Arcadia Avenue near the intersection of Eden Avenue and Arcadia Avenue. Brookside Avenue can also be accessed from the northwest corner of the Subject Property by driving over the railroad.

The Minneapolis, Northfield and Southern Railroad adjoin the Subject Property to the west.

Retaining walls line the Subject Property in the north on three sides.

3.5 CURRENT USE OF ADJOINING PROPERTIES

Current uses of the adjoining the properties are summarized below.

North-	Commercial/retail building owned by CSM Corp.
East-	Eden Avenue Grill, Eden 100 (Office building)
South-	Our Lady of Grace Church, Minnesota Wanner Co.
West-	Edina Bus Garage, Parking Ramp, and Jerry's Enterprises Inc. (commercial/retail use)

4.0 User Provided Information

4.1 TITLE RECORD INFORMATION

The user provided title record information. The Certificate of Title does not indicate any environmental concerns with respect to the Subject Property.

A copy of title record information provided is in Appendix A.

4.2 ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

No notices of correspondence from any government agency relating to past or current violations of environmental laws with respect to the Subject Property or relating to environmental liens encumbering the Subject Property have been found.

4.3 SPECIALIZED KNOWLEDGE

The owner of the Subject Property is not aware of any environmental concerns on the Subject Property.

4.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

The user was not aware of commonly known or reasonably ascertainable information other than what has been provided.

4.5 VALUATION REDUCTION FOR ENVIRONMENTAL REASONS

According to representations made in the interview process, environmental liability or adverse environmental conditions were not a consideration at the time of this review.

4.6 OWNER, PROPERTY MANAGER AND OCCUPANT INFORMATION

The City of Edina has owned and used the Subject Property as its public works office since the early 1960s. Wayne Houle, City of Edina Director of Public Works, was interviewed on behalf of the City of Edina.

4.7 REASON FOR PERFORMING PHASE I ESA

This Phase I ESA is being performed to qualify for landowner liability protections to CERCLA liability and to determine whether *recognized environmental conditions* affect the Subject Property.

5.0 Records Review

5.1 STANDARD ENVIRONMENTAL RECORD SOURCES

Wenck requested and reviewed a search of files from federal and state databases through Environmental Data Resources, Inc. (EDR) for the Subject Property. The information from the file search is presented in Appendix B. Files searched include a more extensive list than those minimally identified as required by the Practice and the AAI Rule, however, at a minimum, the following lists were reviewed with respect to the minimum search distances identified below.

Federal Database	**Search Radius**
EPA National Priority List (NPL) sites	1.0 mile
EPA Delisted NPL sites	0.5 mile
EPA Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS) sites	0.5 mile
CERCLIS No Further Remedial Action Planned (NFRAP) sites	0.5 mile
EPA Corrective Action Report (CORRACTS) sites	1.0 mile
EPA Resource Conservation and Recovery Act (RCRA) Treatment Storage and Disposal (TSD) Facility sites	0.5 mile
EPA RCRA Large Quantity Generator (LQG) sites	Subject Property and
EPA RCRA Small Quantity Generator (SQG) sites	adjoining sites only
Federal Institutional Control / Engineering Control Registry sites	Subject Property only
EPA Emergency Response Notification System (ERNS) sites	Subject Property only

State or Tribal Equivalent Database	Search Radius
State or tribal equivalent Hazardous Waste sites	1.0 mile
State or tribal equivalent CERCLIS sites	0.5 mile
State or tribal equivalent Landfill or Solid Waste Disposal sites	0.5 mile
State or tribal equivalent Leaking Storage Tank sites	0.5 mile
State or tribal equivalent Registered Storage Tank sites	Subject Property and adjoining sites only
State or tribal equivalent Institutional Control / Engineering Control Registry sites	Subject Property only
State or tribal equivalent voluntary cleanup program sites	0.5 mile
State or tribal equivalent brownfield sites	0.5 mile

Subject Property

The Subject Property **is** listed on seven of the reviewed regulatory databases.

The Subject Property is listed as an underground storage tank (UST) site. A 3,000 gallon diesel tank, a 12,000 gallon gasoline tank, three 10,000 gallon gasoline tanks, a 10,000 gallon diesel tank, a 6,000 gallon gasoline tank, a 5,500 gallon gasoline tank, a 6,000 gallon diesel tank, a 1,000 gallon fuel oil tank, and a 400 gallon used oil tank are all listed as removed. A removed underground storage tank does not eliminate the possibility of residual petroleum contamination at a site; however the past presence of an underground storage tank does not necessarily indicate the presence of petroleum contamination at a site either.

The Subject Property is also listed as an above ground storage tank (AST) site. A 12,000 gallon gasoline tank, a 12,000 gallon diesel tank, and a 1,000 gallon used oil tank are all listed as active. Again, the presence of an AST does not indicate the presence of a petroleum or hazardous substance release.

The Subject Property is listed as a RCRA Small Quantity Generator of hazardous waste with no violations found.

The Subject Property is listed on the FINDS database with other pertinent environmental activity identified at the site. FINDS stands for Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail.

The Subject Property is listed on the HMIRS database. HMIRS stands for Hazardous Materials Information Reporting System. HMIRS contains hazardous material spill incidents reported to the U.S. Department of Transportation. The HMIRS database lists a spill of 30 gallons of fuel oil on August 26, 2004 caused by overfilling. The spill was cleaned up by spreading floor dry.

The MN SPILL database lists the Subject Property as "response completed." The spill was estimated as 15 gallons of light fuel oil and diesel resulting from an aboveground storage tank overfill. The spill is listed as taking place on April 18, 2000 and as impacting the street and parking lot. Another spill was reported on August 10, 1988. This spill is listed as being 55 known gallons of agricultural pesticide or fertilizer swept down the drain. The spill was closed on January 1, 1996.

The last database listing the Subject Property is the MN AG SPILLS database. MN AGSPILLS is a database for incidents involving agricultural chemicals, and is administered by the Minnesota Department of Agriculture. No details are given, except that the spill was closed on January 12, 1996. The spill was likely associated with the agricultural pesticide or fertilizer spill reported in the MN SPILLS database.

Surrounding Sites

Additional sites identified within the search radii defined by the Practice are as follows:

22 RCRA Small Quantity Generator (SQG) of Hazardous Waste sites

1	MN List of Sites (LS)
12	Leaking Underground Storage Tank (LUST) sites
11	Underground Storage Tank (UST) sites
1	Leaking Aboveground Storage Tank (LAST) site
2	Aboveground Storage Tank (AST) sites

Among the 22 reviewed RCRA-SQG facilities within 1/2-mile of the Subject Property, there was one facility with reported violations. Minnesota Wanner Co., located adjacent to the Subject Property across Eden Avenue to the south, had three violations. Two violations were Generator-Other Requirements and one was a Generator-Pre-Transport Requirement. The date compliance was reached on all three violations was January 20, 1993.

The EDR database identified one Minnesota List of Sites (LS). LS sites include all sites on the MPCA's Master Entity System (MES), which historically has been all those sites subject to state Superfund liability, including all Site Response Program sites of interest: namely, CERCLIS, NFRAP-CERCLIS, Federal NPL sites, State PLP sites, delisted NPL or PLP sites, MN VIC Program sites, and any sites that have been part of an open dump inventory. Finally, all sites subject to a solid waste facility permit are entered into MES and, as a result, are on the LS. The LS does not "double-count" VIC Program sites where there are multiple voluntary parties, which may result in additional VIC Program sites on a single piece or real property. The site, located 1/8-1/4 mile east of the Subject Property is Grandview Square. The site is listed as a Voluntary Investigation and Cleanup (VIC) site with no other details.

The EDR database lists twelve Leaking Underground Storage Tank (LUST) sites within ½ mile of the Subject Property. Of the twelve sites, all have been granted regulatory closure except one, meaning the investigation of extent and magnitude has been completed, and no risk pathways are completed requiring corrective action or on-going monitoring activities. A closure letter does not eliminate the possibility of residual contamination at the site. The one site not granted regulatory closure is the Edina Holiday Station, located approximately 1/8 to 1/4 mile north northwest of the Subject Property. A petroleum leak was reported on July 3, 2002, but no other

details are given. Of the eleven closed LUST sites, two border the Subject Property. The Hennepin Coop, is listed as 0 to 1/8 mile east southeast of the Subject Property. However, this was not verified during site reconnaissance. The Hennepin Coop is listed with a five gallon light fuel oil and diesel spill closed on August 7, 2000. The Edina School Bus Garage is located adjacent to the Subject Property across the railroad tracks to the west southwest. A gasoline, diesel, and used or waste oil leak of an unknown amount was reported on August 27, 1991. The leak site was closed on August 17, 1992. According to the MPCA leak site database, contaminated soils remain on the site.

The EDR database lists eleven Underground Storage Tank (UST) sites located within 1/4-mile of the Subject Property. Registered UST sites, while potentially posing a threat of release, do not indicate an imminent threat of release. Two of the UST sites border the Subject Property. The Edina School Bus Garage west southwest of the Subject Property is listed with three active USTs and three removed USTs. The Our Lady of Grace School is located across Eden Avenue east southeast of the Subject Property. One removed fuel oil UST is listed at the school. The remaining nine sites are located west, southwest, or northwest of the Subject Property from 1/8 to 1/4 mile away.

The EDR database lists one Leaking Aboveground Storage Tank (LAST) site located within 1/8 to 1/4 mile south southwest of the Subject Property. A fuel oil 1 and 2 leak was reported at the Former Railroad Property on November 12, 1996. The exact address of this former railroad property is unknown. The site was closed on October 20, 1997. However, according the MPCA leak site database, contaminated soils remain at the site.

Two Aboveground Storage Tank (AST) sites were identified. Registered AST sites, again similar to UST sites, have the potential to pose the threat of release, but do not indicate an imminent threat of release. Grandview Tire and Auto, located between 1/8 and 1/4 mile northwest of the Subject Property, has one removed AST, and five active ASTs. The active tanks include a 1,000 gallon motor oil tank, a 2,000 gallon motor oil tank, a 2,000 gallon used or waste oil tank, a 500 gallon transmission fluid tank, and a 500 gallon antifreeze tank. The Edina

School Bus Garage has an active 265 gallon "new oil" AST, a 200 gallon active window washer fluid AST, and a 200 gallon active antifreeze AST.

Ten additional "orphan" sites (or non-geocoded sites) were revealed in the regulatory database. Although these sites may be located within the local zip code, they do not have specific addresses and have not been mapped. A list of these unmapped sites is provided in Appendix A.

Wenck reviewed the limited address information provided and recognized some of the sites as similar to or the same as sites already discussed. EDINA, CITY OF and EDINA CITY GARAGE are four of the orphan sites. Two of these four are thought to be the same as the Edina Public Works Garage, i.e. the Subject Property. These two orphan sites are listed on the MN Spills database.

Wenck reviewed the limited address information provided for the other "orphan" sites and did not identify additional sites of concern within the given search distances. It should be noted that not enough information on the exact location of the additional sites was available in order to determine if they present a material threat of release to the Subject Property.

5.2 ADDITIONAL RECORD SOURCES

Additional record sources may be consulted when, in the judgment of the Environmental Professional, such additional records are reasonably ascertainable, sufficiently useful, accurate and complete, and are generally obtained pursuant to good commercial and customary practice. Such records may include local brownfield lists, or other local lists similar to those federal, state and tribal lists identified in Section 5.1. Such sources may include local health or environmental departments, fire departments, planning departments, building permit or inspection departments, and other local pollution, water quality or utility companies.

5.3 PHYSICAL SETTING SOURCES

5.3.1 Topography

The Subject Property surface elevation is approximately 910 to 920 feet NGVD. The surface topography is generally flat sloping to the south. However, retaining walls in the northern portion of the Subject Property separate the generally flat parking/storage and building areas from higher elevation vegetated areas on the northern edges of the Subject Property.

5.3.2 Geology

The surficial geology at the Subject Property consists of loamy till. The texture of this soil is chiefly loam, with a few beds and lenses of stratified sediment. The loamy till is underlain by Superior lobe stratified sediment or till generally at a depth of more than 20 feet in the eastern part of Hennepin County, and more than 50 feet in the western part. It also includes small areas of thick, fine, loamy colluvium (Meyer and Hobbs, 1989.)

Bedrock geology in the area of the Subject Property consists of the Platteville and Glenwood formations. The formations include fine-grained limestone containing thin shale partings near the top and base, underlain by green, sandy shale of the Glenwood Formation, which is so thin that it is not always reported in well records (Olsen and Bloomgren, 1989). Depth to bedrock is approximately 50 to 150 feet.

5.3.3 Hydrogeology

Regional groundwater flow at the water table is to the southeast toward the Minnesota River (Kanivetsky, 1989). However, local groundwater flow may be toward Minnehaha Creek to the northeast. Depth to groundwater is approximately 40 feet.

Bedrock aquifer groundwater flow is also expected to be to the southeast.

5.4 HISTORICAL USE INFORMATION

5.4.1 Aerial Photographs

Aerial photographs were reviewed from 1937, 1940, 1953, 1957, 1964, 1969, 1979, 1984, 1991, 1997, 2000, 2003. The aerial photographs are presented in Appendix C.

1937 Photograph

The 1937 photograph shows the Subject Property with a building built along the railroad on the west side. A few trees appear to dot the property in the south, a small agricultural area appears to be in the north, and the rest of the property appears to be grassed. A driveway can be seen entering the property on the east side. The property appears to lie in an agricultural area, with the surrounding properties in what looks to be agricultural or homestead use. Arcadia Avenue is visible to the east of the Subject Property and Eden Avenue is visible to the south. The overall quality of the aerial photograph is fair; some of the buildings and land forms are hard to make out because of the lack of sharpness of the photograph.

1940 Photograph

The 1940 photograph shows the Subject Property with what appears to be a railroad spur coming onto the Subject Property from the north off of the railroad to the west. The railroad spur appears to run along the east side of the building. The remainder of the Subject Property looks as it did in the 1937 photograph. To the west, driveways can be seen and it appears as if the land is being developed. A few more homes appear to have been added around the Subject Property. The land across Highway 100 to the northeast appears to be being developed into a residential area.

1953 Photograph

The 1953 photograph shows the Subject Property with what appears to be a parking lot on the east side. The outline of the railroad spur can still be seen. A building appears to be in the southwest corner. The general area around the Subject Property now appears to be developed, with residential areas visible where agricultural land was once located.

1957 Photograph

The 1957 photograph shows the Subject Property with another building along the south property border. More large, commercial/industrial style buildings have appeared on the north and west sides around the Subject Property.

1964 Photograph

The 1964 photograph shows the Subject Property with one large building. Trees are visible east of the building, and a driveway can be seen entering the building from the south. All other buildings and the railroad spur are no longer visible. More large, industrial/commercial style buildings have been added north and west in the area immediately surrounding the Subject Property.

1969 Photograph

The 1969 photograph shows the Subject Property with all the trees removed. Cars are visible east of the building in what appears to be a parking lot. Also, what appears to be a small building or stockpile is visible in the northeast corner of the Subject Property. All areas immediately surrounding the Subject Property now appear to be industrial/commercial in nature.

1979 Photograph

The 1979 photograph shows the Subject Property without the small building or stockpile that had been visible in the 1969 photograph. Trees now appear scattered around the southern border of the Subject Property. Additional cars or equipment also appear to be parked north of the

building on the Subject Property. The surrounding areas continue to remain industrial/commercial in nature, with the exception of a baseball diamond to the southeast.

1984 Photograph

The 1984 photograph shows the Subject Property and surrounding properties as in the 1979 photograph.

1991 Photograph

The 1991 photograph shows the Subject Property and surrounding properties as in the 1984 photograph.

1997 Photograph

The 1997 photograph shows the Subject Property and surrounding properties as in the 1991 photograph.

2000 Photograph

The 2000 photograph shows an additional building in the northwest corner of the Subject Property. Two aboveground storage tanks are visible in the northeast corner of the Subject Property. Surrounding properties continue to appear industrial/commercial in nature with the exception of the baseball diamond to the southeast. A portion of the building southwest of the Subject Property has been demolished.

2003 Photograph

The 2003 photograph shows the Subject Property as in the 2000 photograph. New buildings have been constructed southwest of the Subject Property.

5.4.2 City Directories©

City directories were obtained from the HIG Digital Library containing Polk's Minneapolis Suburban City Directories. Streets included are Arcadia Avenue, Brookside Avenue, Eden

Avenue and Gus Young Lane. Years reviewed were 1956, 1962, 1967, 1972, 1977, 1982, 1988, and 1999.

The Eden Avenue City Directory Review showed the following:

There was no listing for the site in the 1956, 1962, or 1967 directories.

The 1972 directory lists the site at 5146 Eden Avenue as the Edina Pub Wks Bldg.

The 1977, 1982 and 1988 directories list the site at 5146 Eden Avenue as the Edina City Pub Wks Bldg.

The 1999 directory had no listing for the Site.

The review of the Arcadia Avenue Review, the Brookside Avenue Review, and the Gus Young Lane Review did not reveal any entries for the Site.

City Directories are included in Appendix D.

5.4.3 Historical Maps

Nine (9) historical maps were reviewed, including the 1898 Northwestern Map Publishing Co. Atlas of Hennepin County, Village of Edina, the 1913 Hennepin County Atlas and Publishers Atlas of Hennepin County, Village of Edina, six USGS quadrangle maps (1901 Minneapolis South, Minnesota 15-Minute Quadrangle; the 1952 Minneapolis South, Minnesota 7.5-Minute Quadrangle; the 1967 Minneapolis South, Minnesota 7.5-Minute Quadrangle, the 1972 Minneapolis South, Minnesota 7.5-Minute Quadrangle, the 1977 Minneapolis South, Minnesota 7.5-Minute Quadrangle, and the 1993 Minneapolis South, Minnesota 7.5-Minute Quadrangle), and an undated plat map.

The 1898 map shows the Subject Property without improvements. The property owner appears to be A.P. Stanchfield.

The 1913 map shows the site as undeveloped. The name on the south side of the Subject Property appears to be M.N. and the name on the north side appears to be Grand View Heights. Eden Prairie Road is visible to the south.

Very little detail is discernable on the 1901 topographic map.

The 1952 topographical map shows the Minneapolis, Northfield and Southern railroad running along the west side of the Subject Property. The north side of the Subject Property is shaded red implying that it is residential or developed property, while the southern side of the Subject Property is shaded yellow to show other use. Two buildings are visible on the Subject Property, one long building along the railroad in the north and one smaller square building in the southwest corner.

The 1967, 1972, 1977, and 1993 topographic maps show the large Edina Public Works building on the Subject Property. The two buildings shown on the 1952 topographic map are gone. The entire area of the Subject Property is shaded yellow to show non-residential/other use.

The undated plat map show the Subject Property divided into 19 lots, with the 18 north plots shown as part of the Grand View Heights development. The Minneapolis Northfield and Southern railroad is visible on the west edge and Arcadia Avenue is visible on the east edge.

These maps are included as Appendix E.

5.4.4 Sanborn® Fire Insurance Maps

A search was conducted to determine if Sanborn® Fire Insurance Maps were available for the Subject Property. Sanborn® maps were created for insurance underwriters and often contain

information regarding the uses of individual structures and the locations of fuel and/or chemical storage tanks that may have been on a particular property.

Sanborn® maps were not available for the Subject Property.

The Sanborn® maps no coverage available document is located in the back of Appendix B.

5.4.5 City of Edina Building Permit Information

The City of Edina Building Inspection Office building permit records were obtained and reviewed to better define the chronology of development and use of the Subject Property.

The earliest record with respect to the Subject Property is a building permit for the construction of the Public Works Building on lots 2 through 10 of Block 2 of the Grandview Heights development at 5146 Eden Avenue in 1969. In 1979 a permit was issued to build an office in the shop area of the Edina Public Works Building. In 2000 a geotechnical evaluation was completed for a proposed gas pump relocation. In 2003 plans were completed for the installation of a hydraulic hoist at the Subject Property.

Building permit records are included in Appendix F.

5.4.6 City of Edina Fire Department Records

City of Edina Fire Department records were requested relative to 5146 Eden Avenue. Available fire inspection records were reviewed for the years 1986 through 2004.

An application dated October 27, 1986 indicates the presence of flammable or combustible liquids and tanks. The application includes two maps which show two former underground fuel storage tanks and a fuel filling island to be removed from the southeast corner of the Subject Property just north of the east driveway. The maps also show plans to install four new

underground fuel storage tanks on the north edge of the Subject Property, piping from north to south in the grassed area on the east side of the Subject Property, and a new fuel filling island to be installed just north of the former filling island.

A Hazardous Waste Generator Local Authority Notification dated December 17, 1990 indicates the presence of and gives a map showing the locations of spent lead acid storage batteries in the northwest corner of the building, a parts cleaning tank with solvent in the shop area in the southwest corner of the building, used tires stored just outside the north wall of the building, and used oil stored in an underground tank south of the building just west of the garage door.

An aboveground Flammable and Combustible Liquids Plan Review Guideline dated October 15, 1998 lists two 12,000 aboveground fuel storage tanks (one gasoline and one diesel) to be installed and gives detailed information concerning the tanks. A letter dated November 12, 1998 indicates approval of the installation of the two aboveground fuel storage tanks. A permit for the installation of the tanks is dated November 17, 1998.

A letter indicating the completion of monitoring and soil sampling during underground storage tank removal is dated September 8, 1999. The included site diagram shows the four underground fuel storage tanks in the north as removed. The letter and included laboratory analytical report indicate that a petroleum release did not occur from the USTs.

A fax to the fire department dated February 26, 2004 includes Material Safety Data Sheets for windshield washer fluid stored at the Edina Public Works building in an aboveground storage tank.

The Fire Department Records are included in Appendix G.

5.4.7 Hennepin County Tax Assessor Information

Tax assessor information was reviewed for details that may pertain to environmental considerations with respect to the Subject Property. No additional information was revealed in the tax files that would indicate a potential environmental condition.

These tax records are included in Appendix H.

6.0 Site Reconnaissance

6.1 SUBJECT PROPERTY OBSERVATIONS

Wenck staff visually observed the Subject Property to identify current land use, obtain evidence of past uses, and to identify surface characteristics of the Subject Property for the presence of recognized environmental conditions. Wenck staff conducted a site reconnaissance on December 22, 2006. Mr. Wayne D. Houle, Director of Public Works, and Mr.Greg Bretson, Equipment Operations Foreman, were present during site reconnaissance.

The site reconnaissance consisted of walking throughout the Subject Property and along its perimeter. During the site reconnaissance, the exterior of the Subject Property was observed with any exceptions noted in section 2.4 of this report. Wenck staff observed (from the Subject Property boundaries) the adjoining properties for evidence of recognizable environmental conditions with the potential to affect the Subject Property and for indications of past and current land use.

The Subject Property contains a 40,468 square foot concrete block main building. The main building is slab on grade with a spancrete pre-stressed concrete roof topped with gravel and tar. The building includes a main office section in the southeast corner; storage, maintenance, and repair areas along the east side; an equipment maintenance and storage garage spanning the majority of the building; and more small offices and storage places in the southwest corner. A detached salt storage building was located north of the main building (photograph 1). A paved parking lot is located east and north of the main building (photograph 2). West of the main building is a narrow grassed area (photograph 3). South of the main building is grass with a paved driveway from Eden Avenue to the south garage door (photograph 4). A narrow strip of grass and other vegetation runs along Arcadia Avenue to the east of the parking lot and north of the parking lot between the Subject Property and the property to the north.

Subject Property photographs are included in Appendix I.

6.1.1 Materials Management

There are materials currently managed on the Subject Property. Flammable materials storage areas are spread throughout the building (photograph 5). In addition, cleaning products, machinery maintenance lubricants, and herbicides were observed (photographs 6 and 7).

Northwest of the main building road repair materials are stored. These materials include aggregate and asphalt in piles (photograph 8). Surface water from melting snow running into a storm sewer catch basin drain was documented with a petroleum sheen floating on top (photograph 9). This petroleum sheen is thought to be from water percolating through and then running to the storm sewer from the asphalt pile.

6.1.2 Solid and Hazardous Waste Management

Solid waste is generated on site. Solid waste receptacles are located near the garage doors on the north and south sides of the main building (photograph 10). Small quantities of paints and other maintenance chemicals were noted. It is assumed that these materials are completely consumed or disposed of in an appropriate manner. Used oil from equipment is generated at the site and stored in an aboveground storage tank located inside the building near the south garage door (photograph 11). A 55-gallon drum of windshield washer solvent and a 55-gallon drum of recycled antifreeze are also located in the garage.

A parts cleaning station is located in the southeast section of the garage. The parts cleaning station cleans itself and uses a biodegradable solvent that is recycled in the station (photograph 12).

6.1.3 Aboveground and Underground Storage Tanks

There are several aboveground storage tanks (ASTs) on site. One 12,000 gallon concrete diesel fuel tank and one 12,000 gallon concrete gasoline tank are located in the northeast corner of the Subject Property (photograph 13). One 3,000 gallon salt brine tank of poly construction is located on the northwest corner of the Subject Property (photograph 14). The waste oil tank mentioned in Section 6.1.2 is a 440 gallon AST. An estimated 500 gallon salt brine tank is located in the northwest corner of the garage. Six 250 gallon lubricant tanks are located in the southeast corner of the garage. Two 200 gallon carwash and wax soap ASTs are also located in the northwest corner of the garage.

No underground storage tanks (USTs) were observed or are known to exist on the Subject Property at the present time. Historically, the Subject Property had a used oil UST south of the main building west of the garage door, two fuel USTs east of the building just north of the east driveway, and four fuel USTs in the side hill on the north edge of the Subject Property.

6.1.4 Water Supply, Wastewater, and Stormwater

No evidence of water supply wells was noted at the time of the site reconnaissance. The building is connected to public water and sewer. Floor drains located in the center of the garage drain into a sump catch basin and are then pumped into the sanitary sewer. Storm water is collected in catch basins lining the center of the north and east parking areas (photographs 15 and 16). No evidence of on-site ponding was observed.

6.1.5 Wells, Drywells, and Lagoons

There are no known wells, drywells, or lagoons on the Subject Property. A Well Location Diagram provided by the Minnesota Department of Health County Well Index is included in Appendix J.

6.1.6 Polychlorinated Biphenyls

No evidence of polychlorinated biphenyls (PCBs) spills was found on the Subject Property at the time of the site reconnaissance. Three pad-mounted transformers were located on the Subject Property. One was located northwest of the main building, one southwest, and another southeast (photographs 17-19). Fluorescent lights are used and stored in the main building (photograph 20). Fluorescent light ballasts may contain PCBs. Investigation of ballasts is beyond the scope of this assessment. No evidence of leaks or spills was noted in connection with the transformers or lights.

7.0 Interviews

7.1 INTERVIEW WITH DIRECTOR OF PUBLIC WORKS

Date of Interview:	December 22, 2006
Name:	Mr. Wayne Houle
Company Name & Position:	City Edina Director of Public Works
Years familiar with Subject Property:	Unknown
Telephone Number:	952-826-0371

Relevant information provided by Mr. Houle was used throughout this report. Mr. Houle represented the City of Edina as the owner of the Subject Property. He was not specifically aware of any present environmental conditions at the Subject Property. He did mention documented releases to the Subject Property associated with the removal of hydraulic hoists and underground storage tanks in the past. Mr. Houle thought that all impacted soils had been removed from the Subject Property and replaced with clean soils. In addition, Mr. Houle thought that the property south of the Subject Property east of the railroad may be contaminated.

7.2 INTERVIEW WITH EQUIPMENT OPERATIONS FOREMAN

Date of Interview:	December 22, 2006
Name:	Mr. Greg Bretson
Company Name & Position:	Equipment Operations Foreman at Subject Property
Years familiar with Subject Property:	27 years (since 1979)
Telephone Number:	952-826-0306

Mr. Bretson provided relevant information on operations carried out at the Subject Property. He has worked at the Subject Property since 1979. Mr. Bretson gave information about the contents and uses of ASTs at the site, as well as information on the removal of USTs at the site. He stated that an oil tank for blacktopping roads was taken out approximately 10 years ago where the current salt storage building is located. He also provided information on the removal of hoists in

the garage that had been replaced with hoists in a concrete vault. Mr. Bretson stated that the only environmental issue he could think of in regard to the Subject Property was sewer back up from time to time.

7.3 INTERVIEW WITH PUBLIC WORKS COORDINATOR

Date of Interview:	January 3, 2007
Name:	Mr. Steve Johnson
Company Name & Position:	Public Works Coordinator
Years familiar with Subject Property:	24 years
Telephone Number:	952-826-0301

Mr. Johnson provided especially relevant information on the removal of USTs from the Subject Property. He stated that there is no known remaining contaminated soil anywhere on the Subject Property. He also stated that groundwater had not been encountered during any tank excavations. Mr. Johnson thought that the Subject Property had been owned by a school district in the past, and had been used for bus storage. He thought the Subject Property had been acquired from the school district in exchange for the property at the present Edina Schools Bus Garage, directly west of the Subject Property.

7.4 INTERVIEW WITH SUBJECT PROPERTY MASTER ELECTRICIAN

Date of Interview:	December 22, 2006
Name:	Mr. Dan McMahon
Company Name & Position:	Master Electrician at Subject Property
Years familiar with Subject Property:	Unknown
Telephone Number:	952-826-0371

Mr. McMahon provided relevant information on electrical transformers at the Subject Property. He stated that the transformers were dry and had no liquid in them. Therefore, he did not think the transformers would contain PCBs. He knew of no other environmental conditions in relation to the Subject Property.

8.0 Findings

8.1 REVEALED FINDINGS

Based on the revealed information, the Subject Property has been owned by the City of Edina since the early 1960s. The Subject Property is currently the City of Edina Public Works shop. One main building occupies the property, with a smaller salt storage building in the northwest corner of the Subject Property. Buildings can be seen on aerial photos of the Subject Property before current buildings were built.

The former property owner's use of the Subject Property is unknown, but is thought to be in association with busses used by the school district.

Aboveground storage tanks are known to exist on the Subject Property and are used for fuel, used oil, cleaning products, lubricants, and liquids associated with road maintenance. Underground storage tanks were historically used on the Subject Property for fuel and used oil.

No wells were observed or are known to exist in the past on the Subject Property.

The Subject Property **was** listed in the EDR database as a UST site, an AST site, a RCRA Small Quantity Generator, a FINDS site, a HMIRS site, a MN SPILLS site, and a MN AG SPILLS site.

Sites of regulatory interest in the area were revealed and reviewed appropriate to the scope of work of this document. Specifically, the following sites were revealed within the search radii identified by the Practice:

22	RCRA Small Quantity Generator (SQG) of Hazardous Waste sites
1	MN List of Sites (LS)

12 Leaking Underground Storage Tank (LUST) sites

11 Underground Storage Tank (UST) sites

1 Leaking Aboveground Storage Tank (LAST) site

2 Aboveground Storage Tank (AST) sites

In addition, Wenck reviewed ten orphan site listings to determine their potential for environmental impact to the Subject Property.

8.2 DATA GAPS

Historical information was reviewed back to 1898. Data gaps greater than 5 years occurred between 1901 and 1913, 1913 and 1937, 1940 and 1952, and 1957 and 1964. However, ASTM Practice E 1527-05 only requires that historical information be reviewed back to 1940. Also, we were unable to interview past owners of the Subject Property. We do not feel that additional information gained from review of data from these data gaps would substantially change the opinion and conclusions in the following sections.

9.0 Opinions

We have reviewed the above findings and come to the following opinions:

The past use of the Subject Property as agricultural land ***is not*** *a recognized environmental condition.* No information was revealed in the course of this review that would indicate a release of petroleum products or hazardous substances to the soil or groundwater as a result of the Subject Property's agricultural status.

The past use of the Subject Property as unknown while owned by the school district ***is not*** *a recognized environmental condition.* No information was revealed in the course of this review that would indicate a release of petroleum products or hazardous substances to the soil or groundwater as a result of the Subject Property's potential use by the school district.

The current use of the Subject Property as an equipment storage/office building ***is not*** *a recognized environmental condition.* No information was revealed in the course of this review that would indicate a release of petroleum products or hazardous substances to the soil or groundwater as a result of the Subject Property's use as equipment storage and maintenance.

The current use of the Subject Property as an outdoor storage area for asphalt ***is*** *a recognized environmental condition.* A petroleum sheen noted on surface water running into the storm sewer is a documented petroleum release on the Subject Property.

Other sites of regulatory interest revealed within the review area ***are not*** *recognized environmental conditions.* Sites revealed in the regulatory database review do not appear to pose recognized environmental conditions with respect to the Subject Property based on their location relative to the Subject Property or present regulatory status.

10.0 Conclusions

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-05 of the Subject Property located at 5146 Eden Avenue in Edina, MN. Any exceptions to, or deletions from, this practice are described in Section 2.0 of this report. This assessment has revealed evidence of **one** recognized environmental condition in connection with the Subject Property.

- The petroleum sheen noticed running off the asphalt pile located north of the main building into the storm sewer indicates a petroleum release and is a *recognized environmental condition.*

11.0 Deviations

There were no deviations from the scope of work causing this not to meet the ASTM E 1527-05 standard Phase I Environmental Site Assessment.

12.0 Non-Scope Considerations

12.1 ASBESTOS

An asbestos survey was not a part of this scope of work.

12.2 RADON

A radon gas survey was not part of this scope of work.

12.3 LEAD-BASED PAINT

A lead-based paint assessment was not a part of this scope of work.

12.4 LEAD IN DRINKING WATER

An evaluation of the potential for lead in drinking water was not a part of this scope of work.

12.5 WETLANDS

A delineation of potential on-site wetlands was not a part of this scope of work.

12.6 REGULATORY COMPLIANCE

A compliance audit or review of regulatory compliance issues was not a part of this scope of work.

12.7 CULTURAL AND HISTORIC RESOURCES

A review of cultural and historic resources was not a part of this scope of work.

12.8 INDUSTRIAL HYGIENE

A review of issues relating to industrial hygiene was not a part of this scope of work.

12.9 HEALTH AND SAFETY

Health and safety issues were not a part of this scope of work.

12.10 ECOLOGICAL RESOURCES

Ecological resources were not a part of this scope of work.

12.11 ENDANGERED SPECIES

Considerations concerning endangered species were not a part of this scope of work.

12.12 INDOOR AIR QUALITY

Indoor air quality was not a part of this scope of work.

12.13 HIGH VOLTAGE POWER LINES

An assessment of high voltage power lines was not a part of this scope of work.

Company Experience

WENCK ASSOCIATES, INC. is a full-service environmental consulting firm that specializes in providing comprehensive environmental, regulatory, and safety guidance for our client's real estate asset protection, redevelopment and development needs. Collectively, Wenck offers our clients almost 20 years of experience, depth of technical and regulatory knowledge and expertise in the following service areas:

- Environmental Assessment Services (Phase I and II)
- Site Preparation/Planning Services
- Integrated Site Remediation and Risk-based Response Actions
- Storage Tank Removal, Replacement and Compliance
- Stormwater Management Plans and Permitting (NPDES requirements, etc)
- Wetlands Delineation and Mitigation
- Environmental Permitting and Compliance
- Asbestos and Lead Identification and Abatement
- Voluntary Cleanup Programs and Guidance on Public Funding Mechanisms for Brownfield Redevelopment
- Indoor Air Quality Assessment
- Facility Layout Review for Environmental and Safety Efficiency
- Environmental Impact Assessments (EIA) and Statements (EIS), Environmental Assessment Worksheets (EAW), Alternative Urban Areawide Review (AUAR)
- "Green Building" Design Services
- Pollution Prevention Plans

Wenck strives to provide our clients with strategic, high quality and cost-effective services that are customized to their specific needs. For more extensive information on the services we provide please refer to www.wenck.com.

Paul D. Josephson, P.E.

Mr. Josephson has practical experience in the assessment, investigation, cleanup and redevelopment of residential sites.

Mr. Josephson has conducted Phase I Environmental Site Assessments on a wide range of properties including residential, commercial, industrial, manufacturing and public properties. Residential properties range from single-family homes to high-rise apartments. Some vacant properties have been assessed prior to development for residential or commercial use.

Phase II sampling and investigation has been performed when required to further identify and quantify risks associated with residential properties.

Mr. Josephson oversees hazardous materials surveys at various sites including residential properties. Those surveys include identification of asbestos-containing materials, PCB-ballasts, mercury switches, fluorescent lights, lead-based paint, and hazardous chemicals, as well as petroleum. This information is often incorporated into specifications used for bidding and removal of the substances from the properties.

Mr. Josephson has worked with developers to identify, mitigate and manage wetlands around residential developments. He has designed and installed water supplies for a large residential development.

Ryan M. Lefers

Ryan Lefers has a B.S. and M.S. in Agricultural Engineering from South Dakota State University. He has assisted Phase I Environmental Site Assessments on various facilities as well as Phase II investigations.

REGISTRATION

This is to certify that

City of Edina, a Minnesota municipal corporation, 4801 West 50th Street, City of Edina, County of Hennepin, State of Minnesota is now the owner of an estate in fee simple

in the following described land situated in the County of Hennepin and State of Minnesota, to wit:

Lots 2, 3, 4, 5, 6, 7, 8, 9 and 10;
The East 90 feet of Lots 11 to 19 inclusive;

all in Block 2, "Grand View Heights".

That part of Government Lot 8, Section 28, Township 117, Range 21, lying North of the center line of Eden Avenue and East of a line drawn parallel to the main track of the Minneapolis, Northfield and Southern Railway from a point on the North line of said Government Lot 8 distant 582 feet East from the Northwest corner of said Government Lot 8.

Subject to the effect of an Ordinance of the City of Edina relative to platting and subdividing, a certified copy of which is of record in Book 641 of Miscellaneous Records, page 45;

Subject to the charge, as to the East 90 feet of said Lots 11 to 19 inclusive, and all of said part of Government Lot 8, created by the terms of the deed recorded in Book 1970 of Deeds page 279;

Subject to the power line easement and incidental rights connected therewith as to the North 5 feet of said Lot 2 and the North 5 feet of the East 90 feet of said Lot 19, created by the deed of record in Book 2112 of Deeds, page 470;

Subject to the interests shown by the following memorials and to the following rights or encumbrances set forth in Minnesota statutes chapter 508, namely:

1. **Liens, claims, or rights arising under the laws or the Constitution of the United States, which the statutes of this state cannot require to appear of record;**
2. **Any real property tax or special assessment for which a sale of the land has not been had at the date of the certificate of title;**
3. **Any lease for a period not exceeding three years, when there is actual occupation of the premises under the lease;**
4. **All rights in public highways upon the land;**
5. **Such right of appeal or right to appear and contest the application as is allowed by law;**
6. **The rights of any person in possession under deed or contract for deed from the owner of the certificate of title;**
7. **Any outstanding mechanics lien rights which may exist under Minnesota statutes sections 514.01 to 514.17.**

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

RCRAInfo: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System(RCRIS). The database includes selective information on sites which generate, transport, store , treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/13/2006 has revealed that there are 22 RCRA-SQG sites within approximately 0.25 miles of the target property.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

MN-DELTA (Minnesota - Permitting, Compliance, And Enforcement Information Management System) facilitates the issuance of permits and manages compliance

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 09/27/2006
Date Data Arrived at EDR: 11/01/2006
Date Made Active in Reports: 11/22/2006
Number of Days to Update: 21

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL RECOVERY: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Data Arrived at EDR: 02/02/1994
Date Made Active in Reports: 03/30/1994

Last EDR Contact: 11/17/2006
Next Scheduled EDR Contact: 02/19/2007
Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

RCRA: Resource Conservation and Recovery Act Information

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

BROWNFIELDS: Petroleum Brownfields Program Sites
Purchasing, selling, or developing properly can present a special set of obstacles if the property is contaminated with chemicals. The Petroleum Brownfields Program is one of several programs within the Minnesota Pollution Control Agency (MPCA) designed to help people address these obstacles. The purpose of the Petroleum Brownfields Program is to provide the technical assistance and liability assurance needed to expedite and facilitate the development, transfer, investigation and/or cleanup of property that is contaminated with petroleum.

CDL: Clandestine Drug Labs
This data was passively gathered. That is, the DOH asks law enforcement and other agencies to notify them of Clandestine Drug Labs (CDLs). They do not require reporting of events. Therefore the data represents only a subset of all CDLs. This data has not been verified. The DOH has made no attempt to verify that reported CDLs actually occurred. They have no knowledge if the CDL was involved in cooking or just consisted of chemicals associated with Meth production. The reports they receive are that a suspected CDL was seized.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data
Source: PennWell Corporation
Telephone: (800) 823-6277
This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

TABLE OF CONTENTS

The EDR-Site Report™ is a comprehensive presentation of government filings on a facility identified in a search of over 4 million government records from more than 600 federal, state and local environmental databases. The report is divided into three sections:

Section 1: Facility Summary ..... **Page 3**

Summary of facility filings including a review of the following areas: waste management, waste disposal, multi-media issues, and Superfund liability.

Section 2: Facility Detail Reports ..... **Page 4**

All available detailed information from databases where sites are identified.

Section 3: Databases Searched and Update Information. ..... **Page 5**

Name, source, update dates, contact phone number and description of each of the databases searched for this report.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

SECTION 1: FACILITY SUMMARY

FACILITY AREA	FACILITY 1 5146 EDEN AVE EDINA, MN EDR ID #2004090710
WASTE MANAGEMENT Facility generates hazardous waste (RCRA)	NO
Facility treats, stores, or disposes of hazardous waste on-site (RCRA/TSDF)	NO
Facility has received Notices of Violations (RCRA/VIOL)	NO
Facility has been subject to RCRA administrative actions (RAATS)	NO
Facility has been subject to corrective actions (CORRACTS)	NO
Facility handles PCBs (PADS)	NO
Facility uses radioactive materials (MLTS)	NO
Facility manages registered aboveground storage tanks (AST)	NO
Facility manages registered underground storage tanks (UST)	NO
Facility has reported leaking underground storage tank incidents (LUST)	NO
Facility has reported emergency releases to the soil (ERNS)	NO
Facility has reported hazardous material incidents to DOT (HMIRS)	YES - p4
WASTE DISPOSAL Facility is a Superfund Site (NPL)	NO
Facility has a known or suspect abandoned, inactive or uncontrolled hazardous waste site (CERCLIS)	NO
Facility has a reported Superfund Lien on it (LIENS)	NO
Facility is listed as a state hazardous waste site (SHWS)	NO
Facility has disposed of solid waste on-site (SWF/LF)	NO
MULTIMEDIA Facility uses toxic chemicals and has notified EPA under SARA Title III, Section 313 (TRIS)	NO
Facility produces pesticides and has notified EPA under Section 7 of FIFRA (SSTS)	NO
Facility manufacturs or imports toxic chemicals on the TSCA list (TSCA)	NO
Facility has inspections under FIFRA, TSCA or EPCRA (FTTS)	NO
Facility is listed in EPA's index system (FINDS)	NO
Facility is listed in a county/local unique database (LOCAL)	NO
POTENTIAL SUPERFUND LIABILITY Facility has a list of potentially responsible parties PRP	NO
TOTAL (YES)	1

SECTION 2: FACILITY DETAIL REPORTS

Number in Shipment:	1		
Container Gauge:	Not reported		
Manufacture's ID:	14196		
Manuf. Name:	HEIL COMPANY UNKNOWN, XX		
Tank Serial #:	5HTAB43282		
Label:	COMBUST		
Registration #:	Not reported		
Inspection Date:	12/30/99		
Exemption #:	Not reported		
Contributing Cause:	Overloaded/overfilled		
Contributing Object:	NO RESPONSE		
Contributing Failure:	NO RESPONSE		
Affected side:	NO RESPONSE		
Other contributing cause:	NO RESPONSE		
Capacity Container Code:	0		
Number Failed Code:	0		
# in Shipment Code:	0		
Remarks:	DRIVER ERROR, OVERFILLED TANK. SPREAD FLOOR DRY AND CLEANED UP DRIVER WAS DISCIPLINED.		

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

To maintain currency of the following federal, state and local databases, EDR contacts the appropriate government agency on a monthly or quarterly basis as required.

Elapsed ASTM days: Provides confirmation that this report meets or exceeds the 90-day updating requirement of the ASTM standard.

WASTE MANAGEMENT

RCRA: Resource Conservation and Recovery Act Information
Source: EPA
Telephone: 800-424-9346
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/13/2006
Database Release Frequency: Quarterly
Date of Last EDR Contact: 12/13/2006
Date of Next Scheduled Update: 02/19/2007

BRS: Biennial Reporting System
Source: EPA/NTIS
Telephone: 800-424-9346
The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2003
Database Release Frequency: Biennially
Date of Last EDR Contact: 12/15/2006
Date of Next Scheduled Update: 03/12/2007

RAATS: RCRA Administrative Action Tracking System
Source: EPA
Telephone: 202-564-4104
RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995
Database Release Frequency: No Update Planned
Date of Last EDR Contact: 12/04/2006
Date of Next Scheduled Update: 03/05/2007

CORRACTS: Corrective Action Report
Source: EPA
Telephone: 800-424-9346
CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 09/27/2006
Database Release Frequency: Quarterly
Date of Last EDR Contact: 12/04/2006
Date of Next Scheduled Update: 03/05/2007

PADS: PCB Activity Database System
Source: EPA
Telephone: 202-566-0500
PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 07/07/2006
Database Release Frequency: Annually
Date of Last EDR Contact: 11/29/2006
Date of Next Scheduled Update: 02/05/2007

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

MLTS: Material Licensing Tracking System
Source: Nuclear Regulatory Commission
Telephone: 301-415-7169
MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 10/19/2006
Database Release Frequency: Quarterly
Date of Last EDR Contact: 01/02/2007
Date of Next Scheduled Update: 04/02/2007

MN AST: Aboveground Storage Tanks
Source: Minnesota Pollution Control Agency
Telephone: 651-296-0930
Registered Aboveground Storage Tanks.

Date of Government Version: 09/01/2006
Database Release Frequency: Semi-Annually
Date of Last EDR Contact: 12/08/2006
Date of Next Scheduled Update: 03/05/2007

MN UST: Underground Storage Tank Database
Source: Minnesota Pollution Control Agency
Telephone: 651-649-5451
Registered Underground Storage Tanks. UST's are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA) and must be registered with the state department responsible for administering the UST program. Available information varies by state program.

Date of Government Version: 09/01/2006
Database Release Frequency: Varies
Date of Last EDR Contact: 12/08/2006
Date of Next Scheduled Update: 03/05/2007

MN LUST: Leak Sites
Source: Minnesota Pollution Control Agency
Telephone: 651-296-6300
Leaking Underground Storage Tank Incident Reports. LUST records contain an inventory of reported leaking underground storage tank incidents. Not all states maintain these records, and the information stored varies by state.

Date of Government Version: 09/01/2006
Database Release Frequency: Semi-Annually
Date of Last EDR Contact: 12/08/2006
Date of Next Scheduled Update: 03/05/2007

ERNS: Emergency Response Notification System
Source: National Response Center, United States Coast Guard
Telephone: 202-260-2342
Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2005
Database Release Frequency: Annually
Date of Last EDR Contact: 10/24/2006
Date of Next Scheduled Update: 01/22/2007

HMIRS: Hazardous Materials Information Reporting System
Source: U.S. Department of Transportation
Telephone: 202-366-4555
Hazardous Materials Incident Report System. HMIRS contains hazardous material spill incidents reported to DOT.

Date of Government Version: 08/01/2006
Database Release Frequency: Annually
Date of Last EDR Contact: 10/18/2006
Date of Next Scheduled Update: 01/15/2007

WASTE DISPOSAL

NPL: National Priority List
Source: EPA
Telephone: Not reported
National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 09/27/2006
Date Made Active at EDR: 11/22/2006
Database Release Frequency: Quarterly
Date of Data Arrival at EDR: 11/01/2006
Elapsed ASTM Days: 21
Date of Last EDR Contact: 11/01/2006

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System
Source: EPA
Telephone: 703-603-8960
CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 08/09/2006
Date Made Active at EDR: 11/22/2006
Database Release Frequency: Quarterly

Date of Data Arrival at EDR: 09/21/2006
Elapsed ASTM Days: 62
Date of Last EDR Contact: 12/19/2006

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned
Source: EPA
Telephone: 703-603-8960
Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/10/2006
Database Release Frequency: Quarterly

Date of Last EDR Contact: 12/18/2006
Date of Next Scheduled Update: 03/19/2007

ROD: Records Of Decision
Source: EPA
Telephone: 703-416-0223
Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 10/07/2006
Database Release Frequency: Annually

Date of Last EDR Contact: 01/02/2007
Date of Next Scheduled Update: 04/02/2007

NPL RECOVERY: Federal Superfund Liens
Source: EPA
Telephone: 202-564-4267
Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991
Date Made Active at EDR: 03/30/1994
Database Release Frequency: No Update Planned

Date of Data Arrival at EDR: 02/02/1994
Elapsed ASTM Days: 56
Date of Last EDR Contact: 11/17/2006

SECTION 3: DATABASES SEARCHED AND UPDATE DATES

...Continued...

MN SHWS: Site Remediation System Database
Source: Minnesota Pollution Control Agency
Telephone: 651-296-6300
The SRS database includes all sites that the State Superfund Program is dealing with or has dealt with. The Superfund Program identifies, investigates and determines appropriate cleanup plans for abandoned or uncontrolled hazardous waste sites where a release or potential release of a hazardous substance poses a risk to human health or the environment.

Date of Government Version: 09/26/2006
Database Release Frequency: Annually
Date of Last EDR Contact: 01/02/2007
Date of Next Scheduled Update: 04/02/2007

MN SWF/LF: Permitted Solid Waste Disposal Facilities
Source: Minnesota Pollution Control Agency
Telephone: 651-296-7276
Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 09/01/2006
Database Release Frequency: Varies
Date of Last EDR Contact: 12/08/2006
Date of Next Scheduled Update: 03/05/2007

MULTIMEDIA

TRIS: Toxic Chemical Release Inventory System
Source: EPA
Telephone: 202-566-0250
Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2004
Database Release Frequency: Annually
Date of Last EDR Contact: 12/19/2006
Date of Next Scheduled Update: 03/19/2007

SSTS: Section 7 Tracking Systems
Source: EPA
Telephone: 202-564-4203
Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2004
Database Release Frequency: Annually
Date of Last EDR Contact: 11/07/2006
Date of Next Scheduled Update: 01/15/2007

TSCA: Toxic Substances Control Act
Source: EPA
Telephone: 202-260-5521
Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2002
Database Release Frequency: N/A
Date of Last EDR Contact: 10/18/2006
Date of Next Scheduled Update: 01/15/2007

RMP: Risk Management Plans
Source: Environmental Protection Agency
Telephone: 202-564-8600
When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

This document reports that the largest and most complete collection of Sanborn fire insurance maps has been reviewed based on client supplied information, and fire insurance maps depicting the target property at the specified address were not identified.

NO COVERAGE

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

CAUTION . . .
Pay no money in advance to itinerant Directory Canvassers. We are led to mention this from the fact that certain parties have fraudulently using our publications as specimens, and by that means collecting money in advance. Before signing an order, see that it has the name of the publisher of this City Directory printed thereon. We ask no payment until the work is delivered, and our solicitors have strict orders not to take advance payment for either advertising or subscriptions.

April 27, 2000

Project BABX-00-0177

Mr. Wayne Houle, PE
City of Edina
4801 West 50th Street
Edina, MN 55424-1394

Dear Mr. Houle:

Re: Geotechnical Evaluation for the Proposed Gas Pump Relocation, Public Works Building, Edina, Minnesota

The geotechnical evaluation you requested has been completed. The purpose of the evaluation was to assist you and your consultants in evaluating the subsurface soil and groundwater conditions with regard to support of the above-ground tanks and proposed retaining walls. This letter summarizes our results and recommendations. More details regarding our findings, recommendations and methods are included in the attached report.

Summary of Results

Three standard penetration test borings were completed on this site. Borings ST-1 and ST-2 typically encountered 12 feet of silty sand and gravel fill. Below the fill, the borings encountered poorly graded sand to the boring termination depths. Boring ST-3 encountered 3 feet of sandy lean clay fill underlain by clay and silt to 12 1/2 feet below grade. Underlying the silt, silty sand was encountered to the boring termination depth. Water was not encountered in the borings while drilling nor to cave-in depths of 5 1/2 to 13 feet.

Summary of Recommendations

Based on the soil borings, it appears that the soils are generally suitable for support of the proposed gas pump platforms and retaining wall foundations but may require some limited subcutting. Since there is potential for water to seep into the excavation in Boring ST-3, we recommend the excavation for the retaining wall footings be subcut a minimum of 2 feet and replaced with compacted crushed rock. The rock will provide increased stability and a better drainage path than the silty and clay.

RE: Resource Conservation and Recovery Act

Dear Sir:

The U.S. Environmental Protection Agency has promulgated regulations as required by the Hazardous and Solid Waste Amendments of the Resource Conservation and Recovery Act, which govern the handling and disposal of hazardous wastes.

As part of these regulations, generators of hazardous waste are required to notify all emergency response personnel that may be called upon to provide services. The notification is intended to establish cooperation in minimizing hazards to human health or to the environment from any unplanned release of hazardous wastes, and request services, if needed, in case an emergency situation arises involving wastes from our facility.

The role of your authority in an emergency involving hazardous waste at this location would be in treating emergency conditions or victims of an emergency. In light of this, we would like to identify the types of wastes that are common to our operation. Because of the nature of operations specific substances cannot be stated, however typical waste types include the following:

1. Spent lead acid storage batteries
2.
3. Parts changing tank - solvent
4.
5. Used tires
   Used oil

In order to facilitate emergency responses, we include a description of facility entrance access and location of production areas:

Public Works Building - 5146 Eden Ave, Edina, MN 55436

North - South overhead doors

We appreciate your assistance in this matter and look forward to any comments you may have on this emergency notification plan. Please contact me at 927-8861 if I can provide further information.

Sincerely,

Steve Johnson Title Administrative Assistant

REQUIRED EMERGENCY EQUIPMENT

The following emergency equipment is on hand at this company location.

1. **Internal Communication or Alarm System** - notifies employees of an emergency.
You must have one of the following:
[Check those present] [location]

X	phone	Main entry - hallway
X	intercom	Office
	alarm	
	other(describe)	

2. **External Communication System** - summons assistance from local authorities.
You must have one of the following:
[Check those present] [location]

X	phone	Offices - Public Works Building
X	2-way radio	Offices - Public Works Building
	alarm	
	other(describe)	

3. **Portable Emergency Response Equipment**
You must have one each of the following:

[location]

a. fire extinguishers
i. In office and throughout building
ii.
iii.

b. Spill Control Equipment

X	floor dry	b. In maintenance shop area

VAULTED FUEL STORAGE SYSTEMS

COMPLIANCE

Convault Tanks meet and/or exceed all federal, state and local regulations for above ground fuel storage, safety and environmental compliance.

TECHNICAL SUPPORT

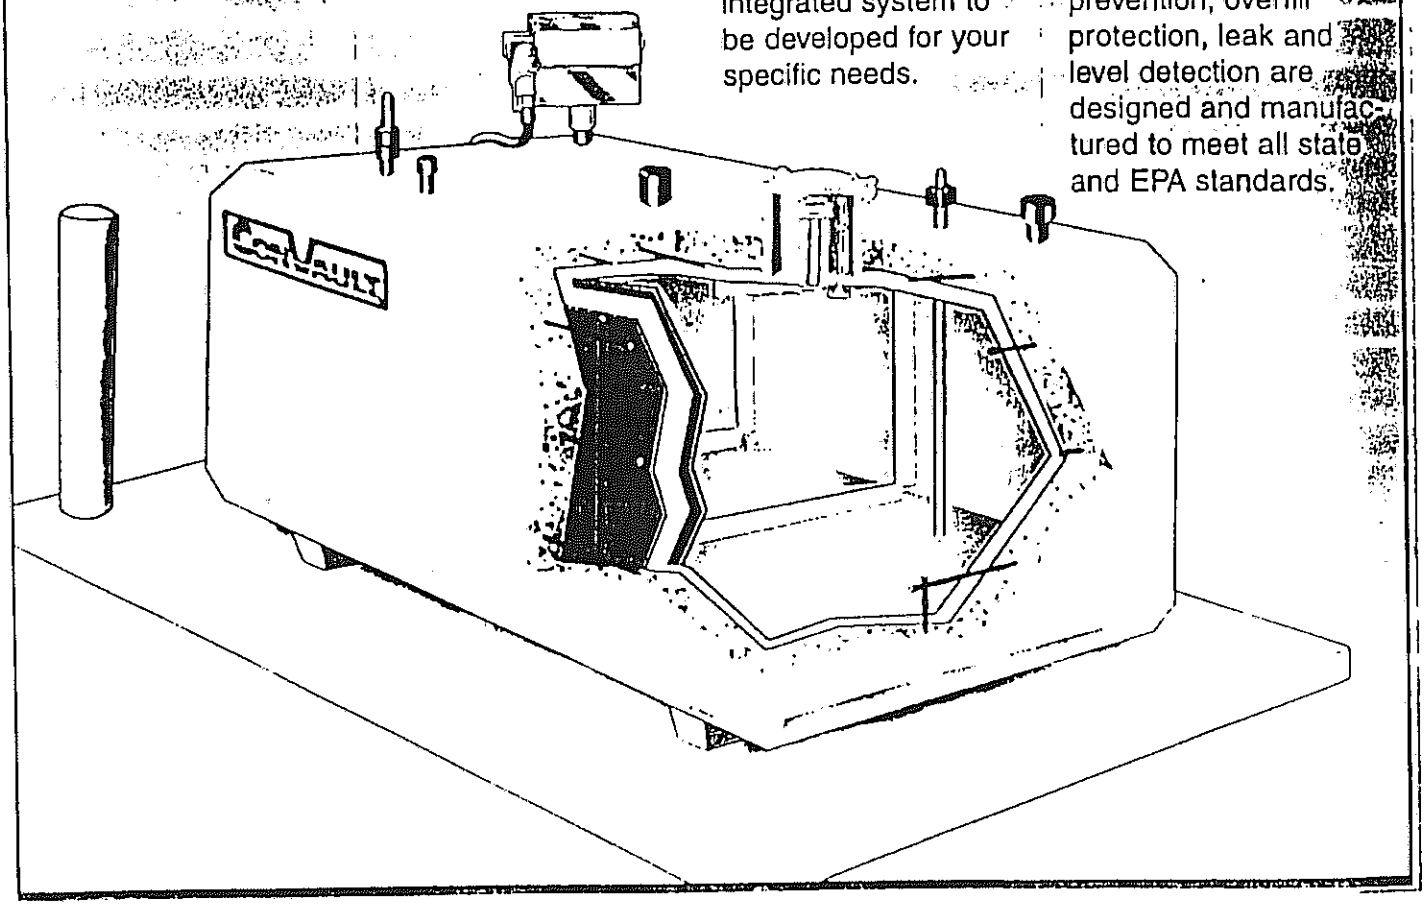
Convault Tanks are supported by specialists trained in the technology and regulations relevant to solving your individual fuel storage problems. During installation and operation, engineering support is easily provided via our toll-free number.

INTEGRATED SYSTEMS

Convault Tanks are designed for functional compatibility to meet your exacting requirements and if needed, interface with other systems at your facility. Specialized components, controls, and monitoring systems will allow a completely integrated system to be developed for your specific needs.

THE UST ALTERNATIVE

Convault Tanks can release you and your company from the liability of underground tanks while fully complying with fire and building code requirements for aboveground fuel storage systems. Convault Tanks and components for spill prevention, overfill protection, leak and level detection are designed and manufactured to meet all state and EPA standards.



POLLUTION SOLUTIONS

6640 INDUSTRY AVE. NW • RAMSEY, MN 55303 • (612) 323-3548 • 1-800-480-3548 • FAX (612) 323-3526

SPECIFICATIONS FOR ABOVEGROUND STORAGE TANKS

The Insulated Secondary Containment Aboveground Storage Tank Systems for Flammable and Combustible Liquids, Protected Type: Vehicle Impact Protected, and Projectile Resistant shall be tested to and listed for the following:

A) UL - 142, aboveground steel tanks for flammable and combustible liquids.

B) UL - 2085, two hour furnace fire test and two hour simulated pool fire test for insulated and protected tank.

C) UL - 2085 and UFC Test Standard APPENDIX #A-II-F-1, for both Vehicle Impact Protection and Projectile Resistance.

D) UL - 2085, insulated aboveground tanks for flammable and combustible liquids.

E) UL -2085 Non-Metallic Secondary Containment protected tanks for flammable and combustible liquids with secondary containment Emergency Venting by "Form of Construction".

F) ULC/ORD - C 142.16, protected aboveground tank assemblies for flammable and combustible liquids.

G) ULC/ORD - C 142.5, concrete encased aboveground tank assemblies for flammable and combustible liquids.

H) ULC/ORD - 142.16, the furnace burn requirements for two hour fire rating.

I) ULC/ORD - 142.5, the open (pool) fire testing for two hour flammable liquid fire test.

J) ULC/ORD - 142.23, aboveground tanks for used oil.

K) The requirement for uniform fire code for two hour (fire wall) test.

6640 INDUSTRY AVE. NW • RAMSEY, MN 55303 • (612) 323-3548 • 1-800-480-3548 • FAX (612) 323-3525

- To be tested and certified by the California Air Resources Board (CARB) for Balanced Phase 1 and Phase 2 Vapor Recovery including methanol and ethanol.

The primary steel tank shall be rectangular in shape and have continuous welds on all exterior seams, and manufactured in accordance with U.L. 142 except for the 125 Gallon primary steel tank which shall be circular and manufactured in accordance with U.L. 142.

The primary steel tank shall be pressure tested at 5 psig for 24 hours.

The primary steel tanks shall have "emergency vent" system as per NFPA 30 Code requirements.

The protected and insulated AST systems shall have a thru tank leak detector tube to allow for physical checkup and monitoring capability between the primary and the secondary containment.

The primary steel tank shall be pressurized at 5 psig during concrete encasement.

The outer surface of the primary steel tank shall be covered by a minimum of 1/4" Thick (6.4 mm) Styrofoam insulation panels or equally acceptable thermal insulation.

The secondary containment shall consist of a 30 Mil thick (0.78 mm) High Density Polyethylene membrane enclosing the steel tank and insulation material.

The primary steel tank and the secondary containment shall be encased in six inches of monolithic reinforced concrete, with a minimum design strength of 4,000 and 5,000 psi at 28 days depending on the tank size. The concrete design shall include the following for long term durability: air entrainment, water reducing admixture, and steel reinforcement.

The protected and insulated AST systems shall be of concrete exterior and a continuous and visually verifiable monolithic (seamless) pour on top, bottom, ends, and sides and contain no cold joints or heat sinks (heat transfer points). The AST must be shop fabricated and tested in accordance with the UL listings.

6640 INDUSTRY AVE. NW • RAMSEY, MN 55303 • (612) 323-3548 • 1-800-480-3548 • FAX (612) 323-3526

- No steel or insulating material shall come in contact with the concrete or other corrosive material.
- All openings shall be from the top only.
- All exposed metal must be powder coated to inhibit corrosion.
- The protected and insulated AST systems shall include a minimum 5-15 gallon powder coated, U.L. listed spill containment, and shall include normally closed valve to release spilled product into the primary steel tank.
- The protected and insulated AST systems shall have a coated concrete exterior to resist weather and reflect sunlight.
- The protected and insulated AST systems shall have a warranty of 30 years.
- The protected and insulated AST systems shall have two (2) lugs for connecting grounding conductors for lightening protection in accordance with NFPA 78.

6640 INDUSTRY AVE. NW • RAMSEY, MN 55303 • (612) 323-3548 • 1-800-480-3548 • FAX (612) 323-3526

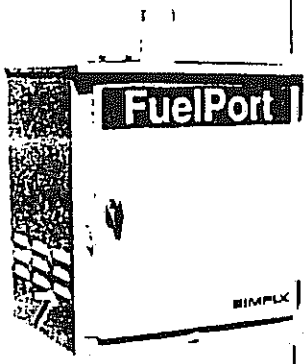
FuelPort



Description

The Simplex FuelPort is a compact, economical solution for simple filling and spill prevention for aboveground storage tanks. The FuelPort includes all valves and fittings necessary for hose connection from a pumper truck to an above ground storage tank, packaged within a lockable, weatherproof spill containment box. The FuelPort can be bolted to the tank, hung from the fill pipe, or attached via clamps to a 2" or 3" post. The FuelPort is suitable for use with fuel oil or gasoline. An optional vapor recovery adaptor is available

Includes:

- Weatherproof, lockable box with 7 gallon spill containment
- Tank mounting weld brackets (2)
- FuelPort mounting tabs to accept weld brackets (above) or post clamps (2" or 3", optional)
- Quick disconnect hose coupling with dust plug
- Check valve
- Shutoff valve
- Hand pump for spill containment, with shutoff and check valve
- Ground stud

Specifications:

Fitting size: 2", 3" or 4"
Spill containment: 7 gallons
Hand pump capacity: 1 gpm
Paint: white epoxy
Net weight: 129 lbs.

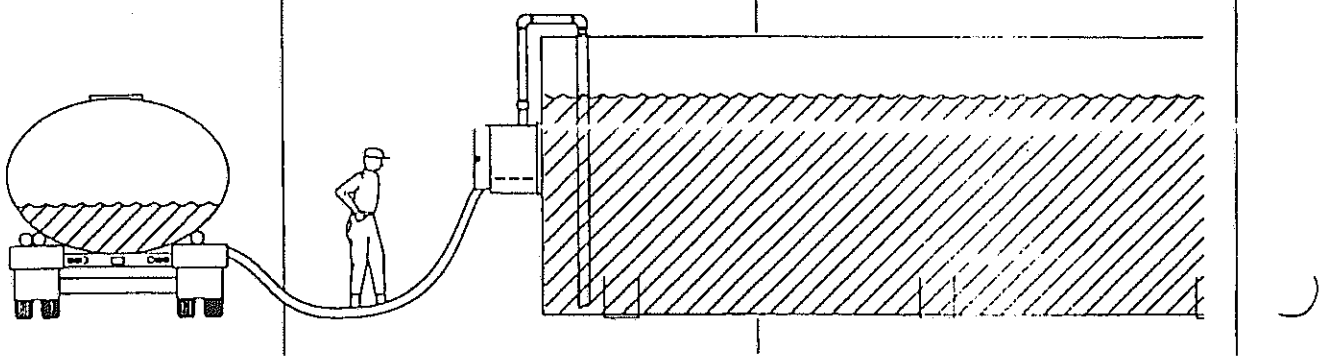
Fittings: 2", 3" or 4"

Inlet to accept

- Standard fitting: Quick disconnect coupling with check valve, shutoff ball valve
- Optional fitting: Buyer specified dry connect

Outlet fitting:

- Threaded pipe welded in top panel, 3" NPT threads
- Optional gasoline vapor recovery adaptor



Simplex, Inc. 1139 North MacArthur Boulevard Springfield, Illinois 62702 217-525-6995 24 hr 217-[illegible] Fax 217-525-7984

Edina Public Works 5146 Eden Ave. Edina, MN 55436
Steve Johnson 826-0301. Installation of two approved aboveground two-hour protected storage tanks for dispensing, one 12,000 gallon gasoline and one 12,000 gallon diesel. Subject to attached notes, SFMD inspection and local approval.

To Whom it may concern:

The plans for the above installation have been reviewed pursuant to Minnesota Statutes, 1984, Chapter 299F.19.

Preliminary approval is given for the aforementioned project subject to compliance with the provisions of Minnesota Statutes, State Fire Marshal Regulations, and local ordinances and permits. Construction shall be in conformance with Article 79, Flammable and Combustible Liquids, contained in Minnesota Uniform Fire Code (1991 edition as amended).

Final approval will be given following an inspection of the facility by either your area local fire authority or Deputy State Fire Marshal.

Approval of the project described in this letter does not relieve the applicant of responsibility to other Federal, State or local agencies regarding adherence to regulations or the need to obtain necessary approval.

Questions concerning this project should be addressed in writing to our office for a formal response.

Please refer to the file number listed above in all future correspondence concerning this project.

Yours very truly,

Thomas R. Brace, State Fire Marshal

Construction shall be in conformance with Article 79, Flammable and Combustible Liquids, contained in Minnesota Uniform Fire Code (1991 edition as amended).

Final approval will be given following an inspection of the facility by either your area local fire authority or Deputy State Fire Marshal.

Approval of the project described in this letter does not relieve the applicant of responsibility to other Federal, State or local agencies regarding adherence to regulations or the need to obtain necessary approval.

Questions concerning this project should be addressed in writing to our office for a formal response.

Please refer to the file number listed above in all future correspondence concerning this project.

Yours very truly,

Thomas R. Brace, State Fire Marshal

Kevin Kelly
Deputy State Fire Marshal - Code Specialist

AMCOR Precast | ConVault | Oldcastle

VAULTED FUEL STORAGE TANKS

The ConVault AST is a patented and totally portable tank system consisting of a steel primary tank (fabricated in accordance with U.L. standard 142) within a non-metallic secondary containment which is monolithically entombed in 6 inches of reinforced concrete at 5000 PSI. The ConVault tank is constructed free from "heat sinks" without any steel penetrations on the walls, bottom ,or top of the tank and is seamless there by completely thermally isolating the inner steel tank and thus totally eliminating the risk of potential conductivity from any source.

All ConVault tanks are constructed using a patented monolithic (**no seams**) process and has earned **FOUR** U.L.2085 sub set listings. **1.** Insulated (fire rated) **2.** Protected type. (This listing includes collision protection and ballistic protection criteria) **3.** Non-Metallic secondary containment protected tanks for flammable and combustible liquids with secondary containment. **4.** emergency Venting by "Form of construction".

ConVault tanks meet all national/regional/state/local codes and standards to include UFC Appendix A-II-F-1 , NFPA 30 and 30A, BOCA ,SBCCI, and IFC fire safety standards.

ConVault tanks provide top fittings only, in accordance with all codes and standards which prevents potential leeks from valves, fittings, and fill pipes. spill prevention during tank filling is provided by a **7 gallon U.L. listed** container that surrounds the filling system. In the event of an overfill, the product will be completely contained in the spill container and then drained back into the main tank. Additionally, direct level reading gauges, audible alarms, and automatic shut off devices can be installed to meet specific jurisdictional requirements.

Through the years, thousands of ConVault Systems have been installed and remain in service through out the world. Since we introduced vaulted tank technology our proven national safety record and continual U.L. performance and testing, has resulted in the safest "AST" tank system available.

NO CONVAULT AST HAS EVER EXPERIENCED A SYSTEM FAILURE

After you have had a chance to review this material, contact us or visit our web site at WWW.CONVAULT.COM. We would be happy to answer any questions and supply you with additional information. I trust the ConVault Tank System meets your requirements.

Sincerely,

Michael J. Anger

PERMIT APPLICATION

NOTE: This permit application is to be used only for specialized system installations requiring a separate fire department permit, plan review, inspection and approval. These systems shall consist of but shall not be limited to: fire alarm systems or modifications, fire alarm or sprinkler monitoring equipment, fire protection systems (not including sprinkler systems), commercial cooking ventilation systems, etc.

Please make the permit fee check or money order payable to "CITY OF EDINA".

PRINT OR TYPE ALL RESPONSES ON THIS FORM (EXCEPT WHERE A SIGNATURE IS REQUESTED).

RE: UST Removal Monitoring
City of Edina
5146 Eden Avenue
Edina, MN 55424

Dear Mr. Johnson:

Per your authorization of August 20, 1999, Peer Environmental & Engineering Resources, Inc. (PEER) has completed the requested monitoring and soil sampling at the above-referenced underground storage tank (UST) removal site.

SCOPE OF SERVICES

The services completed by PEER included the following:

- Collection of twelve soil samples from the UST basin for field screening purposes. The samples were screened for the presence of organic vapors with a 11.8 eV photoionization detector (PID).
- Collection of eight soil samples from the bottom of the UST basin for laboratory analysis for Diesel Range Organics (DRO), Gasoline Range Organics (GRO), and benzene, toluene, ethylbenzene, and xylenes (BTEX).
- Preparation of this letter report summarizing the results of the field screening and laboratory analysis.

BACKGROUND INFORMATION

The site is a public works garage for the City of Edina located at 5146 Eden Avenue in Edina, Minnesota. Four USTs were removed from the site. The following table summarizes the UST information.

UST Number	Size/Type	Contents
UST 1	12,000 gallons fiberglass	Gasoline
UST 2	12,000 gallons fiberglass	Gasoline
UST 3	12,000 gallons fiberglass	Diesel
UST 4	12,000 gallons fiberglass	Diesel

FIELD DOCUMENTATION

Westside Equipment of Hamel, Minnesota removed the USTs on August 20 and August 23-24, 1999. Following removal of the USTs, twelve soil samples were collected from the tank basins for field screening with a PID. The locations of the USTs and soil samples are indicated on the attached Figure 1. Ground water was not encountered in the UST basin.

The PID results are summarized in the following table:

Sample Number	Location	PID Reading (in parts per million)
B-1 (9')	Bottom of UST 1 basin	5.1
B-2 (9')	Bottom of UST 1 basin	0.0
B-3 (13')	Bottom of UST 2 basin	0.0
B-4 (13')	Bottom of UST 2 basin	0.0
B-5 (12')	Bottom of UST 3 basin	3.2
B-6 (12')	Bottom of UST 3 basin	3.2
B-7 (13')	Bottom of UST 4 basin	3.2
B-8 (13')	Bottom of UST 4 basin	3.2
S-1 (6')	Sidewall of UST 1 basin	0.0
S-2 (6')	Sidewall of UST 1 basin	0.0
S-3 (6')	Sidewall of UST 1 basin	0.0
S-4 (6')	Sidewall of UST 1 basin	0.0

Eight soil samples from the tank basins were submitted to Braun Intertec Laboratories on August 23 and 24, 1999 for DRO, GRO, and BTEX laboratory analysis. No DRO, GRO, or BTEX concentrations were identified above the laboratory detection limit in the samples. A copy of the laboratory analytical report is attached.

CONCLUSION

Based on the field data and laboratory analytical results, a petroleum release did not occurred from the USTs.

If you have any questions regarding this letter, please do not hesitate to contact us at 612-831-3341 at your convenience.

Sincerely,

Peer Environmental & Engineering Resources, Inc.

Report 99-06364
Project CVXX-95-117I

Mr. Matthew J. Evans
Peer Environmental
7710 Computer Avenue
Suite 101
Minneapolis, MN 55435

Dear Mr. Evans:

Re: 9243
City of Edina

Braun Intertec Corporation received your analytical request on August 23, 1999. Analytical results are summarized on the following laboratory report.

Routine Braun Intertec Corporation QA/QC was followed. Quality control data have been reviewed.

When possible these samples will be held by the laboratory for 14 days from the date of this report. The process of disposing or returning the samples will occur at that time. Arrangements can be made for extended sample storage by contacting us at this time.

We appreciate the opportunity to meet your analytical needs. If you have any questions or would like additional information, please call William Scruton at 612-942-4946.

Sincerely,

William H. Scruton
Project Manager

MINNESOTA STATE FIRE MARSHAL DIVISION
ABOVEGROUND TANK PLAN REVIEW NOTES

Edina Public Works - Edina, MN - File No.: 98297 (UL 2085)

This installation shall comply with the Minnesota Uniform Fire Code (MUFC). The following are requirements from the MUFC that contain instructions applicable to this project. These requirements must be complied with.

1. Installations are only allowed when approved by the local fire chief.

2. Dispensers shall be located a minimum of 10 feet from buildings and property lines and when the hose is fully extended the nozzle shall not come within 5 feet from building openings.

3. Dispensing hoses shall be no longer than 18 feet long unless at a marine or aircraft fuel dispensing station.

4. ASTs shall be provided with secondary containment that will hold the volume of the largest AST within the secondary-containment area. Examples include dike, drainage control, listed double-wall ASTs and listed secondary containment built into the AST.

5. Dispensing and fill piping shall not penetrate a dike.

6. ASTs shall be protected from collision, spillage and overfill as required by the local fire chief.

7. ASTs shall have impact protection such as 4" guard posts spaced 4' apart.

8. There shall be an emergency shut-off device located not closer than 20 feet and not farther than 100 feet from the dispenser. Activation of the emergency shut-off device shall shut down transfer of fuel to the dispenser and shall close all valves that supply fuel to the dispenser. The emergency shut-off device shall be distinctly labeled EMERGENCY SHUTDOWN DEVICE.

9. There shall be provided a portable fire extinguisher with a minimum rating of 20:BC located no farther than 75 feet from the dispenser.

10. Signs shall be conspicuously posted, visible from each dispenser, prohibiting smoking, dispensing into unapproved containers, requiring vehicle engines to be stopped and prohibiting those under 16 years old from dispensing combustible or flammable liquids.

11. Weeds, grass, brush, trash and all other combustible materials shall be kept at least 10 feet away from ASTs

12. ASTs shall have a 3-foot separation between them.

13. ASTs shall be labeled to identify the contents of each tank.

14. ASTs require normal and emergency venting. The normal vent shall terminate a minimum of 12 feet above the ground and 5 feet from any building openings or property lines that are or can be built upon.

15. Electrical equipment shall be installed in accordance with the Minnesota Electrical Code.

16. ASTs shall not exceed 12,000 gallons individual capacity or 48,000 gallons aggregate capacity at any one dispensing site.

17. ASTs 6,000 gallons or less shall be located 15 feet from property lines which can be built upon, including opposites sides of a public way. ASTs shall be located 5 feet from buildings and the near side of a public way.

18. ASTs more than 6,000 gallons shall be located 25 feet from property lines which can be built upon, including opposite sides of a public way. ASTs shall be located 15 feet from buildings and the near side of a public way

19. ASTs shall have over-fill prevention that will provide notification at 85% full and automatically stop fuel flow at 90% full.

20. Dispensing devices can be installed on or adjacent to the AST.

21. Antisyphon devices shall be installed on the external piping when the piping extends below the liquid level of the AST.

22. Fill openings shall have a spill container with at least a 5-gallon capacity.

23. ASTs shall be provided with lightning protection in accordance with National Fire Protection Association 780 (1994 ed.).

MATERIAL SAFETY DATA SHEET

FILE

CITY SHOPS 3-8-04

MATERIAL IDENTITY: -25F Splash Windshield Washer Fluid

SECTION 3 - PHYSICAL/CHEMICAL CHARACTERISTICS

Boiling Point: Approximately 160°F (for product)

Flash Point: 60°F

Solubility in Water: Soluble

Vapor Pressure: 100mm @ 21.2° (methanol)

Vapor Density: 1.11 (methanol)

Ionization Potential: 10.84 cV (methanol)

Freezing Point: -31°F

CLASS 1-C

Appearance and Odor: The windshield washer is blue, and it has a mild characteristic pungent odor from the methanol. The odor threshold for methanol is 10 ppm.

SECTION 4 - FIRE AND EXPLOSION HAZARD DATA

Flammable Limits: UEL - 36 percent for methanol LEL - 6 percent for methanol

Autoignition Temperature: 878°F for methanol

Extinguishing Media for Methanol

Small Fires: Dry chemical, carbon dioxide, water spray or alcohol resistant foam.
Large Fires: Water spray, fog or alcohol-resistant foam.

Special Fire Fighting Procedures: Move container away from fire area if you can do so without risk. Dike fire control water for later disposal; do not scatter the material. Apply cooling water to the sides of containers exposed to flames until well after the fire is out.

Unusual Fire and Explosion Hazards for Methanol: Flammable/combustible material; may be ignited by heat, spark or flame. Vapors may travel to a source of ignition and flash back. Container may explode in heat of fire. Vapor explosion and poison hazard indoors, outdoors, or in sewers. Runoff to sewer may create fire or explosion hazard.

SECTION 5 - REACTIVITY DATA

Stability/Polymerization: In a closed container, methyl alcohol is stable at room temperature and it is stable under routine handling and storage. Hazardous polymerization will not occur.

Incompatibility (Material to Avoid): Incompatible with beryllium dihydride; metals; oxidants; potassium tert-butoxide; carbon tetrachloride + metals; dichloromethane. Can react vigorously with oxidizing materials.

Explosive reaction with chloroform + sodium methoxide; diethyl zinc. Violent reaction with alkyl aluminum salts; acetyle bromide; chloroform + sodium hydroxide; CrO_3; cyanuric chloride; (I + ethanol + HgO); $Pb(ClO_4)_2$; $HClO_4$; P_2O_5; (KOH + $CHCl_3$); nitric acid[1]

Hazardous Decomposition or By-products: When methanol is heated to decomposition, carbon dioxide and carbon monoxide may be produced, as well as formaldehyde may be produced, and it emits acrid smoke and irritating fumes.

[1]Lewis, Richard J., Sr.: *Sax's Dangerous Properties of Industrial Materials, Eighth Edition.* New York, New York: Van Nostrand Reinhold, 1992.

MATERIAL SAFETY DATA SHEET

MATERIAL IDENTITY: -25F Splash Windshield Washer Fluid

SECTION 6 - HEALTH HAZARD DATA

Routes of Entry (Methanol): The primary routes of entry are inhalation, ingestion, and absorption.

Health Hazards and Signs and Symptoms of Exposure (Methanol): Irritant to eyes, skin, and upper respiratory system. Headaches, drowsiness, dizziness, vertigo, light-headed, nausea, and vomiting. Visual disturbance, optic nerve damage, and blindness. Skin exposure hazard.

Target Organs: Central nervous system, digestive tract, eyes, and skin.

Acute Effects: Eye irritation. Inhalation can result nose irritation, headache, fatigue, nausea, visual impairment or complete and possible blindness, acidosis, convulsions, circulatory collapse, respiratory fatigue, and death. Ingestion can cause gastrointestinal (GI) irritation followed by the symptoms described for inhalation and possible kidney impairment. Skin contact results in a cold sensation, dryness, and cracking, possibly leading to dermatitis. Methyl alcohol may be absorbed through the skin and may cause headache, fatigue, and visual disturbances. Eye contact results in irritation with lacrimation, inflamed lids, and photophobia.

Chronic Effects: Chronic exposure may result in visual impairment or blindness.

Medical Conditions Generally Aggravated by Exposure: Ocular, respiratory, or dermal disorders may be aggravated by methanol exposure.

Emergency and First Aid Procedures:

Eyes:	Rinse with water 15 to 20 minutes, seek medical assistance.
Skin:	Flush with water for 15 minutes.
Inhalation:	Remove from source to fresh air, provide respiratory support as needed.
Ingestion:	Induce vomiting, then give two teaspoons of baking soda in a glass of water; call a physician.

SECTION 7 - PRECAUTIONS FOR SAFE HANDLING AND USE

Steps to be Taken in Case Material is Released or Spilled:

- Keep unnecessary people away; isolate hazard area and deny entry.
- Stay upwind; keep out of low areas.
- Shut off ignition sources; no flares, smoking or flames in hazard area.
- Positive pressure self-contained breathing apparatus and chemical protective clothing is recommended for personnel involved in clean-up procedures with no fire.
- Do not walk through spilled material; stop leak if it can be done without risk.
- Water spray may reduce vapor; but it will not prevent ignition in closed spaces.

Waste Disposal Method: Dispose of in accordance with federal, state and local regulations.

EPA Designations:

RCRA Hazardous Waste (40 CFR 261.33): Hazardous Waste No. U154
CERCLA Hazardous Substance (40 CFR 302.4): Not Listed
SARA Extremely Hazardous Substance (40 CFR 355): Not Listed
SARA Toxic Chemical (40 CFR 372.65): Not Listed

DOT Designation: Based on flash point and alcohol content, this is a Class 3, flammable liquid.

MATERIAL SAFETY DATA SHEET

MATERIAL IDENTITY: -25F Splash Windshield Washer Fluid

SECTION 8- SPECIAL PROTECTION INFORMATION

Respiratory Protection: Under normal use conditions (outdoor windshield cleaning), respiratory protection is not justified.

Protective Eye Wear: Splash goggles are recommended when handling the solution. Contact lens use is not recommended.

Protective Clothing: The selection of protective clothing and gloves is dependent upon anticipated exposure. As reported by the manufacturer, Best Glove style 725R (PVC) offers excellent protection for up to 240 minutes of complete immersion.

SECTION 9- OTHER HAZARDOUS INFORMATION AND DEFINITIONS

OSHA PEL: The Occupational Safety and Health Administration's Permissible Exposure Limit, which is defined as the maximum concentration of contaminant to which a normal healthy individual may be exposed 8-hours per day, 40-hours per week, without experiencing adverse health effects over a working lifetime.

ACGIH TLV: American Conference of Governmental Industrial Hygienist's Threshold Limit Value, similar to the OSHA PEL but not considered a legal standard.
