

Scenario: WVV's East Gateway (Valley View @ Oak Lawn & 62nd)

F3 **F5**

Rowhouses facing east with Stoop or Porch Frontages (Stoops shown here), provide a welcoming face to travelers, help define the intersection spatially, and provide a graceful transition from the Neighborhood to the Node.

F2

Occasional Doorway frontages brought to the street can reconcile block geometry and provide small but appropriate live/work interfaces.

Vertical 'Gateway' public art placed carefully will simultaneously terminate three sight lines as you approach the node. The art should be meaningful, durable, visible from a distance yet interesting to pedestrians..

Utility boxes could be screened.
