

Sidewalk Improvements
Interlachen Boulevard
(Interlachen Bluff to Summit Avenue)

September 18, 2015

Dear Resident:

The contractor has started working on the sidewalk. They are working from the west and heading east grading the boulevard; next they will place gravel followed by concrete for the sidewalk.

The sidewalk is being installed according to the Americans with Disabilities Act, as such, driveways will be impacted. In most cases, driveways will be replaced between the curb and the sidewalk and beyond the sidewalk to match existing driveways with acceptable grade and slope. Having a wider boulevard area will allow us to install more gradual entrances to driveways.

Mailboxes should not be impacted; however, if they are in the way, the contractor will temporarily relocate them and replace them as soon as the work is done. Mail delivery will not be interrupted.

Please contact me if you have any questions or comments regarding this project, 952-826-0448 or dnorthescold@EdinaMN.gov.

The City of Edina thanks you for your patience and cooperation throughout the project.

Sincerely,
Derek Northescold
Engineering Technician
