## WHAT IS IRISH WHISKEY?

Derived from a Gaelic term meaning "water of life," all true Irish Whiskey must be distilled on the island of Ireland and aged at least three years in wooden casks. Known for its signature smoothness and sweetness, Irish Whiskey differs from Scotch in two areas: Irish Whiskey is usually distilled three times, and the barley is rarely dried over burning peat. Most Scotch is distilled twice and the malt is often peated, giving it a smoky flavor. Although there are certainly exceptions to these rules, Irish Whiskey fans often say it has a unique flavor profile and is exceptionally easy to drink.
